The BP Oil Spill and the Future of Mass Tort Litigation

University of Texas School of Law
Austin, Texas

I. Introduction

In the well-known Greek myth, Prometheus stole fire from the Greek god Zeus and gave it to humanity. In return for this arrogance, Zeus had Prometheus chained to a rock in the Caucasus mountains, where Prometheus was punished by an eagle eating away at his liver, which was regenerated every night. Because Prometheus was immortal, he was condemned to eternal torture by the voracious eagle’s pecking. After thirty years of this punishment, however, Hercules appeared, killed the eagle, and liberated Prometheus from his unending torment. In return for freeing him, Prometheus rewarded Hercules with the secret to completing the eleventh of his famous Herculean labors.¹

On April 20, 2010, an explosion on the Deepwater Horizon rig killed eleven workers and unleashed the reputed worst oil spill in American history. Less than two months later, on June 16th, 2010, BP Oil—after meeting with President Barack Obama—agreed to set up a $20 billion dollar fund to compensate victims of the disaster. Shortly thereafter, BP selected Kenneth Feinberg to oversee the compensation fund and claims process.

In the morality play of the Deepwater Horizon oil spill, BP Oil assumed the Promethean role of modern energy-bringer to mankind. In its arrogance for attempting to expropriate energy from miles below the ocean floor and bring oil to mankind, BP precipitated a massive calamity. As a consequence, BP faced the eternal punishment of being lashed to the American Caucasus of never-ending civil litigation, perpetually to be pecked away by claimants. Rather than endure this interminable retribution, BP instead chose to terminate its own agony as quickly as possible by creating a Fund. And, Hercules—in the form of the heroic Ken Feinberg—appeared to BP just in time to slay the civil litigators and liberate BP. For his efforts at enabling the BP rescue, BP rewarded Ken Feinberg.²

¹ Prometheus gave Hercules the secret to stealing the golden apples from the Hesperides.
² By my somewhat inexpert count, Ken Feinberg might well be performing approximately his seventh Herculean labor, with his preceding feats consisting of his participation as a special master in: (1) negotiating the Agent Orange class action settlement, (2) as a trustee charged with disbursing Dalkon Shield settlement payments, (3) assisting Judge Jack Weinstein of the Federal District Court for the Eastern District of New York in the Brooklyn Navy Yard asbestos cases, (4) managing the WTC Victim’s Compensation Fund, (5) determining Wall Street executive salary compensation under Troubled Assets Relief Program, (6) supervising the Hokie Spirit Memorial Fund after
The appearance of Ken Feinberg as the heroic savior in the Gulf oil calamity was, in no small measure, a consequence of a persona whose reputation has indeed assumed mythic proportions in the public consciousness. As is well-known, Ken Feinberg served as the special master administering the World Trade Center Victims' Compensation Fund in the aftermath of the terrorist attack on the Twin Towers on September 11, 2001. As is equally well-known, Ken Feinberg also has had an extended career serving as a mediator, special master, settlement negotiator, claims administrator, and more recently, as President Barack Obama's Wall Street executive compensation czar.

The selection of Ken Feinberg to administer the Gulf Coast Claims Facility immediately commanded comparison to the World Trade Center Victims’ Compensation Fund. Indeed, Feinberg himself announced that in administering the Gulf Coast Claims Facility, he would be drawing on his vast knowledge and experience in administering the World Trade Center Victims’ Compensation Fund. Many of Feinberg’s initial initiatives—such as town hall meetings and outreach to Gulf fishermen and other claimants—duplicated techniques that Feinberg had developed during his supervision of the World Trade Center Fund.

6 See Strassel, Mr. Fairness, id.

But, the BP Gulf Coast Claims Facility—apart from its superficial designation as a compensation fund—bears little resemblance to the World Trade Center Victims’ Compensation Fund. Although these two “fund” mechanisms have in common the same all powerful administrator, the two funds are entirely unlike one another. And this comparison bears scrutiny and debate, for several compelling reasons.

First, the World Trade Center Victims’ Compensation Fund was widely acknowledged as a *sui generis*, one-time endeavor to compensate victims of a national terrorist disaster.\(^8\) Indeed, the special master Ken Feinberg repeatedly stressed in numerous speeches and writings that the World Trade Center Victims’ Compensation Fund was neither a model for tort reform, nor a model for any future terrorist or other disaster.\(^9\) Ken Feinberg was fairly and consistently insistent that the WTC Fund was not

\[\text{\(9\) Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 84–84; Kenneth R. Feinberg, \textit{What Is Life Worth? The Unprecedented Effort to Compensate the Victims of 9/11} (2005) at 178 ("It would be a mistake for Congress or the public to take the 9/11 fund as . . . a model in the event of future attacks"); Kenneth Feinberg, The Building Blocks of Successful Victim Compensation Programs, 20 Ohio St. J. Dispute Res. 273, 276–77 (2005); Q & A: Kenneth Feinberg, Special Master of the 9/11 Victim Compensation Fund (C-SPAN television broadcast July 10, 2005) (stating that the 9/11 Fund was an aberration and unique); Kenneth R. Feinberg, Negotiating the Victim Compensation Fund of 2001: Mass Tort Resolution Without Litigation, 19 J. Law & Policy 21, 29 (2005) ("9/11 was unique and gave rise to a unique response. That is the only way, I think, to explain it."); Feinberg, Transparency and Civil Justice, supra n. 7.}

a model for anything.\textsuperscript{10} And many, if not most, academic commentators agreed with this assessment.\textsuperscript{11} And yet, the World Trade Center Victims’ Compensation Fund,\textsuperscript{12} in its implementation and design, is now touted as the model for the Gulf Coast Claims Facility.\textsuperscript{13} It should give us some pause that the special master who repeatedly disavowed his own masterwork should now be relying on his work product again, but in a different and anomalous context.

Second, almost every aspect of the Gulf Coast Claims Facility is unlike the World Trade Center Victims’ Compensation Fund. Among numerous features, the funds differ in the nature of the events giving rise to creation of the fund; authorization, rulemaking, review mechanisms, transparency, election of remedies, applicable law, assistance of counsel, litigation alternatives, as well as the role of the prospective defendants. The Gulf Coast Claims Facility has raised challenging ethical and professional responsibility issues, as well as questions relating to the fund’s transparency. Hence, any citations to the WTC Fund as a precedent for the Gulf Coast Claims Facility—by the special master or others—should be viewed with guarded skepticism.

Third, and perhaps most important, the Gulf Coast Claims Facility represents an unnoticed incremental trend towards the lawless, private resolution of mass claims, which resolution (in the case of the Gulf Coast Claims Facility) is created by a culpable defendant, unbounded by legal norms, and administered by a heroic “special master” with limitless unreviewable discretion, who also is in the employ of the malefactor. Whatever else may be argued on behalf of the Gulf Coast Claims Facility, this cannot be a good development.

\textsuperscript{10}Feinberg \textit{et al.}, \textit{Final Report of the Special Master} at 84; Feinberg, \textit{What Is a Life Worth}, supra n. 9 at 178; see also Rabin, \textit{September 11th through the Prism of Victim Compensation}, supra n. 9 at 479 (contending that the thrust of Feinberg’s argument that the September 11th Victim Compensation Fund would be a mistake as a precedent for future programs, is puzzling).

\textsuperscript{11}See e.g, Rabin & Sugarman, \textit{The Case for Specially Compensating the Victims of Terrorist Acts}, supra n. 8 at 913 (“... an ad hoc fund by its very nature runs a substantial risk of being myopic in design—fixed with excessive particularity on the event at hand. In this regard, the 9/11 Fund provides a cautionary note.”); Robert L. Rabin, \textit{The Quest for Fairness in Compensating Victims of September 11}, 49 Cleveland St. L. Rev. 573, 588 (2001); Larry S. Stewart \textit{et al}., \textit{The September 11th Compensation Fund: Past or Prologue?}, 9 Conn. Ins. L.J. 153, 171 (2002) (Fund will not likely serve as model for future reform of American civil justice system).

\textsuperscript{13}See e.g., Charles E. Lavis, \textit{Interview with Ken Feinberg, The Independent Administrator of the BP Oil Spill Victim Compensation Fund} (June 20, 2010), available at http://www.hpoilspilllawblog.com/2010/06/ken-feinberg39s-interview-on-mee.html?utm-sou. (Feinberg drawing on the lessons of the WTC Fund to guide his implementation of the GCCF).
The World Trade Center Victims' Compensation Fund has been widely viewed as a tremendous accomplishment in expeditiously resolving the claims of thousands of grieving victims of an unprecedented terrorist attack. On the other hand, with more considered distance, several scholars have raised probing questions relating to the principles underlying the WTC Fund's compensation scheme, as well as its implementation.

A number of scholars have suggested that the World Trade Center Fund represented a hybrid, hodge-podge of conflicting principles drawn from tort law, private and governmental insurance models, and social welfare schemes. At least one scholar has suggested that the model for

14 See Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 1 (“I am pleased to report that, in my view, the fund was an unqualified success”); Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at (praising the WTC Victim Compensation Fund); Peck, The Victim Compensation Fund, supra n. 8; Kenneth R. Feinberg, Negotiating the September 11 Victim Compensation Fund of 2001: Mass Tort Resolution Without Litigation, 19 J. Law & Policy 21, 29 (2005); Mike Steenson & Joseph Michael Sayler, The Legacy of the 9/11 Fund and the Minnesota I-35W Bridge-Collapse Fund: Creating a Template for Compensating Victims of Future Mass-Tort Catastrophes, 35 Wm. Mitchell L. Rev. 524, 559 (2009) (“By almost all measures, the Fund was a success.”).

16 See e.g., Alexander, Procedural Design, supra n. 5 at 636-39 (different compensation models); Chamallas, The September 11th Victim Compensation Fund, supra n. 5 at 53-55, 58 (describing mixed features of the WTC Fund, and describing the rules and regulations adopted to govern the Fund as a “curious hybrid system”); Diller, Tort and Social Welfare Principles, supra n. 15 at 721, 724, 726-66 (describing the Fund as an amalgam of tort and social welfare schemes); Priest, The Problematic Structure, supra n. 15 at 532-539; Rabin, The Quest for Fairness, supra n. 11 at 576-81; Rabin &
the WTC Fund is the class action settlement mechanism—with Ken Feinberg in the role of settlement negotiator and administrator—but otherwise lacking the attributes of a settlement class. Others have questioned the wisdom of permitting a single, powerful administrator to so completely dominate the creation and implementation of a compensation fund. Surveying this range of criticism, several scholars have suggested that although the WTC Fund commendably compensated some 2700 claimants in a short period of time, and avoided litigation, the World Trade Center Victims’ Compensation Fund nonetheless lacked legitimacy in a democratic society.

The serious challenges that scholars have raised with regard to the legitimacy of the World Trade Center Victims’ Compensation Fund have even more powerful resonance in relation to the Gulf Coast Claims Facility. If the WTC Fund represented a movement towards the embrace of fund-mechanisms for resolving mass tort claims, then the Gulf Coast Claims Facility not only has expanded on this model, but advanced the model in an even more radical, less lawful direction. In this view, it is difficult to discern any basis for legitimacy for the Gulf Coast Claims Facility. For those concerned with the rule of law, equity, and fundamental fairness, the Gulf Coast Claims Facility ought to be a cause for concern.

The arc of Ken Feinberg’s career neatly demonstrates the evolution of at least three different fund models, progressing from arguably the most legitimate to the arguably the least legitimate (and most lawless). This evolution illustrates a seamless progression from (1) a judicially-approved and managed class action fund to (2) a Congressionally-approved settlement fund to (3) the Gulf Coast Claims Facility.

Sugarman, The Case for Specially Compensating the Victims of Terrorist Acts, supra n. 8 at 913; See Rabin, The September 11th Victim Compensation Fund, supra n. 8 at 770 (the WTC Fund is not one model, but three).

See Diller, Tort and Social Welfare Principles, supra n. 15 at 721, 745-47, 757 (“Feinberg’s conception of his role draws on the model of the Fund as a mass tort settlement mechanism.”)

See Elizabeth Berkowitz, The Problematic Role of the Special Master: Undermining the Legitimacy of the September 11th Victim Compensation Fund, 24 Yale Law & Policy Rev. 1, 3-4 (2005) (arguing that Kenneth Feinberg’s role as the special master in administering the WTC Fund should not serve as a model for the future; “Never before in modern times has Congress created a position with so much discretion and so little oversight.”); Diller, Tort and Social Welfare Principles, supra n. 15 at 726, 766-68 (critical of Feinberg’s overweening central role in design and implementation of the Fund);

See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 206, citing Richard C. Reuben, Democracy and Dispute Resolution: The Problem of Arbitration, 67 Duke J. of Law & Contemp. Probs. 279, 285-86 (2004); Berkowitz, id. at 24–26 (suggesting that the WTC Fund’s provision for a litigation alternative was illusory and another ground for ATSA’s illegitimacy); Priest, The Problematic Structure, supra n. 15 at 545; Elizabeth M. Schneider, Grief, Procedure, and Justice: The September 11th Victim Compensation Fund, 53 DePaul Law Rev. 457, 489 (2003) (undemocratic process in establishment of the Fund and selection of the Special Master).
mandated and supervised fund, to (3) a defendant-created and directed fund. In the haste to embrace the fund approach to mass claim resolution, little attention has focused on how these “funds” have evolved from entities governed by the rule of law to a model essentially unconstrained by law.

In the ensuing sections, this paper compares several dimensions of the World Trade Center Victims’ Compensation Fund with the Gulf Coast Claims Facility. By focusing on various aspects of fund creation and implementation, the purpose of these sections is to draw attention to the ways in which the Gulf Coast Claims Facility is unlike the WTC Fund.

After this lengthy exploration of these two funds, the article concludes with a discussion of the concept of a “fund approach” to the resolution of mass tort litigation, and raises concerns about this model. This final assessment considers the Gulf Coast Claims Facility in the context of other fund resolutions of mass claims, returning to the theme that the Gulf Coast Claims Facility represents a radical and troubling departure from other fund resolutions of mass claims, about which rule-of-law advocates ought to be concerned.

II. A Comparison of the World Trade Center Victims’ Compensation Fund and the BP Gulf Oil Fund

The World Trade Center Victims’ Compensation Fund was created nearly a decade ago, and with the passage of time, scholars have generated an enormous body of historical, analytical, and critical literature examining almost every aspect of the WTC Fund. The study of the WTC Fund has been aided by the fact that, as the consequence of Congressional legislation and rulemaking, as well as the transparency afforded by the Fund’s special master, much information about the WTC Fund is in the public domain. In addition, in numerous speeches, articles, books, and media appearances, the WTC Fund special master Ken Feinberg has been unusually active in publicly explaining and defending the WTC Fund. In contrast, the Gulf Coast Claims Facility

21 See e.g., Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER, supra; U.S. Dept. of Justice, Compensation for Deceased Victims: Award Payment Statistics, available at http://www.usdoj.gov/victimcompensation/payments_injury (reporting that the mean award for death claims was approximately $1.8 million, with a high of $6.9 million and a low of $250,00, after offsets).

22 See e.g., Feinberg, WHAT IS LIFE WORTH?, supra n. 9; Feinberg, The Building Blocks, supra n. 9 (commenting on how he designed a successful compensation system for the
not the creature of federal legislation. Consequently, and information relating to the Gulf Coast Claims Facility has been, at this point, less accessible than information relating to the WTC Fund.\textsuperscript{23}

It is not the purpose of this paper to again recite the history of the WTC Fund, which has been explained in great detail in numerous other articles.\textsuperscript{24} Rather, the ensuing sections of this paper focus on various aspects of the WTC Fund, in comparison to the Gulf Coast Claims Facility.

A. Events Giving Rise to Creation of the Funds

The events giving rise to the creation of the WTC Fund and the Gulf Coast Claims Facility differ in significant ways that bear on the legitimacy of utilizing a fund approach to compensate alleged victims of those events.\textsuperscript{25} Indeed, commentators on the WTC Fund have pointed to the unique nature of the events giving rise to creation of the WTC Fund as a reason for not extending the fund approach to other types of calamitous events.\textsuperscript{26} On the other hand, the Gulf Coast Claims Facility was created in the context of events that scholars have suggested are not especially suitable for a fund approach to victim compensation.\textsuperscript{27} As will be discussed, the events that gave rise to the WTC Fund are unlike those that events that undergird the Gulf Coast Claims Facility, in significant ways for assessing the legitimacy of a fund approach to resolving claims.

\textsuperscript{24} See e.g., Feinberg et al., \textit{Final Report of the Special Master}, supra; Ackerman, \textit{The September 11th Victim Compensation Fund}, supra n. 8 at 143–55 (establishing the WTC Fund); Alexander, \textit{Procedural Design}, supra n. 5 at 627–28, 630–33 (legislative history of ATSA); Berkovitz, \textit{The Problematic Role of the Special Master}, supra n. 18 at 5 – 9 (same); Conk, \textit{Will the Post 9/11 World be a Post-Tort World?}, 112 Penn St. L. Rev. 175, 182-88 (2007); Eggan, \textit{Toxic Torts at Ground Zero}, supra n. 15 at 413–20; Katz, \textit{Too Much of a Good Thing}, supra n. 20 at 576–580 (discussing the Fund program); Rabin, \textit{The Quest for Fairness}, supra n. 11 at 576–87;

\textsuperscript{26} See e.g., Feinberg et al., \textit{Final Report of the Special Master} at 83–84; Rabin & Sugarman, \textit{The Case for Specially Compensating the Victims of Terrorist Acts}, supra n. 8 at 913 (terrorist attacks not solid foundation for creating a fund; 9/11 Fund offers no principle upon which to base publically funded compensation mechanism).

\textsuperscript{27} See e.g., Rabin, \textit{The September 11th Victim Compensation Fund}, supra n. 8 at 780–81, 798, 799–803 (suggesting that responsible defendants ought to be charged with the losses reflecting what is required to make a deserving plaintiff whole; “I remain unconvinced that any future special recognition of victims of terrorism outside tort would, or should, depart from the no-m.”).
Almost every narrative of September 11, 2001 focuses on the nearly unprecedented terrorist attack on American soil, comparable perhaps only to the December 7, 1941 surprise attack on Pearl Harbor. Thus, in numerous accounts the WTC attacks typically are characterized as a terrorist act of war, and central to this narrative are descriptions of a traumatized country in the wake of the attacks. Thus, many commentators have reiterated the central theme of national trauma, and a resulting need for unified healing, as a compelling rationale for the swift creation of a compensation fund.

The September 11th WTC terrorist attacks also raised several fundamental legal quandaries which became central to the WTC narrative. For example, it quickly became evident that identifying culpable defendants, in a traditional sense, would raise challenging problems. Cleary, the terrorists who seized and piloted the airplanes that crashed into the World Trade Center towers, the Pentagon, and Shankesville, Pennsylvania, would not be defendants. The terrorists' countries of origin also raised difficulties as prospective defendants, including sovereign immunity defenses. Federal law circumscribed

28 See Alexander, Procedural Design, supra n. 5 at 653-57 (September 11th program formulated as an ad hoc response to events of single terrible day); Feinberg, Negotiating the Victim Compensation Fund, supra n. 9 at 29; Peck, The Victim Compensation Fund, supra n. 8 at 209; Rabin & Sugarman, The Case for Specially Compensating the Victims of Terrorist Acts, supra n. 8 at 913 (invoking the analogy to Pearl Harbor); Rabin, Indeterminate Future Harm, supra n. 15 at 1843 (Pearl Harbor analogy).

29 Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 140-42 (shared national tragedy); see also Peck, id.; Rabin & Sugarman, The Case for Specially Compensating the Victims of Terrorist Acts, supra n. 8 at 913; Steenson & Sayler, supra n. 14 at 531.

30 See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 222 (“But only the most jaded cynic would not see in the Fund the heartfelt desire to aid one’s neighbor in time of need.”); Alexander, Procedural Design, supra n. 5 at 639, 653. In sounding this theme, Professor Alexander has explained:

Or the attacks might be viewed as acts directed symbolically against the entire country and its government, making the victims emblematic surrogates for all Americans. On this view, the expressive content of the act might call for an expressive act of national generosity towards the victims, who should be treated differently from other victims of torts, crimes, or disasters as a way of showing defiance to the perpetrators—in the words of one commentator, “to serve as a national expression of unity in the face of a tragedy unique in American history, as well as to help survivors. Alexander, id. at 639, citing Michael I. Meyerson, Losses of Equal Value, N.Y. Times at D4 (March 24, 2002).

Cf. Rabin & Sugarman, The Case for Specially Compensating the Victims of Terrorist Acts, supra n. 8 at 913 (suggesting that the fact that the 9/11 Fund emerged from the collective conscience of the nation as a response to calamity “does not seem to offer a solid foundation for the future, offering nothing by way of principle.”).

31 Alexander, Procedural Design, id. at 637.

32 Alexander, Procedural Design, id. at 637.
airline liability, and airport screening companies were as yet untested defendants. In the immediate aftermath of the attacks, other potential defendants such as the Twin Tower architects, builders, the Port Authority, and other agencies seemed remote possible defendants. In addition, causation problems loomed large.

As has been recited in every account of the WTC Fund, Congress responded to this unique set of events by enacting federal legislation within eleven days of the Trade Center attacks. The enabling legislation had two well-recognized goals: to limit the airlines’ liability for the attacks and thereby save the airline industry, and to create fund to compensate innocent victims of the attacks. The Act’s second goal was intended to speedily heal the wounds of the unprecedented attacks and to compensate victims of the terrorist attack out of the national treasury. In this view, the entire country responded to the WTC attacks by communally providing aid to innocent victims, against the background of uncertain responsible party culpability.

The events giving rise to creation of the Gulf Coast Claims Facility, in contrast, were not the result of a terrorist attack on American soil, but rather an explosion on a deep-water oil rig platform in the Gulf of Mexico. Eleven oil rig workers were killed, in contrast to the nearly 3,000 people who died or were injured in the collapse of the World Trade Center Towers and the airplane crashes into the Pentagon and Shankesville, Pennsylvania. Thus, the WTC attacks gave rise to a

34 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 3; Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 143; Alexander, Procedural Design, supra n. 5 at 630–31; Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 1; George W. Conk, Will the Post 9/11 World be a Post-Tort World?, 112 Penn State L. Rev. 175, 181 (2007).

36 See e.g., Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 144 (“The Fund reflected the national outpouring of grief and sympathy in the wake of the unprecedented attacks of September 11th); Conk, Will the Post 9/11 World be a Post-Tort World?, supra n. 24 at 181; Feinberg, id.

38 See Colaio v. Feinberg, 262 F. Supp. 2d 273, 278 (S.D.N.Y. 2003)(background events giving rise to World Trade Center litigation); Cooper, Spill Fund Could Prove as
relatively limited universe of personal injury and death claims, while the BP oil spill largely gave rise to environmental pollution, property damage, and business interruption claims from claimants in all fifty states.\textsuperscript{39} In comparison to potential claims arising out of the WTC attacks, the scope of potential BP claimants and liability was enormous. Whereas the WTC attacks implicated problematic defendants enmeshed in complicated causation issues, in contrast, the BP oil spill involved an identifiable responsible party with more readily apparent culpability.\textsuperscript{40}

At least one primary justification for creation of the WTC Fund centered on the idea that the World Trade Center claimants were innocent victims of a national traumatic event.\textsuperscript{41} In light of this rationale, a number of scholars, as well as Ken Feinberg, have argued that the WTC Fund experience should be cabined to the unique terrorist events giving rise to creation of the WTC Fund.\textsuperscript{42} Consequently, these scholars have argued that the WTC Fund experience should not be extended to provide relief in the wake of other calamitous events such as naturally occurring hurricanes, earthquakes, or the like.\textsuperscript{43} Commentators have used this theory to rationalize the federal failure to create a relief fund in the aftermath of Hurricane Katrina, for example.\textsuperscript{44} And, extending this argument, commentators have suggested that compensation fund

\textit{Challenging as 9/11 Payments}, id.

\textsuperscript{39} Jim Snyder, \textit{BP Spill Claims From 50 States Confront Administrator Feinberg}, Bloomberg Businessweek (Aug. 16, 2010), available at http://www.businessweek.com/news/2010-08-16/bp-spill-claims-from-fifty-states-confront-administrator-feinberg (reporting that BP had received more than 142,400 claims from all fifty states; most claims based on economic losses, rather than death or injury); Cooper, \textit{Spill Fund Could Prove as Challenging as 9/11 Payments}, id.

\textsuperscript{40} The Coast Guard almost immediately designated BP as a “responsible party under the \textit{Oil Pollution Act of 1990}, Pub. L. No. 101-380, § 102, 104 Stat. 484, 489 (codified at 33 U.S.C. § 2702 (2006) (hereinafter “OPA”). The OPA states: “each responsible party for a vessel or a facility from which oil is discharged, or which poses the substantial threat of a discharge of oil, into or upon the navigable waters or adjoining shorelines or the exclusive economic zone is liable for the removal costs and damages specified in subsection (b) of this section that result from such incident."

The OPA includes a $75 million cap for oil spill-related environmental damage. In the aftermath of the Deepwater Horizon explosion and spill, legislation was introduced in the Senate to end this cap. See Barry Meier, \textit{Calls to Update Maritime Laws}, N.Y. Times (July 5, 2010), available at http://www.nytimes.com/2010/07/07/business/06seas.html?.

\textsuperscript{41} Ackerman, \textit{The September 11th Victim Compensation Fund, supra} n. 8 at 144; Conk, \textit{Will the Post 9/11 World be a Post-Tort World?}, supra n. 24 at 181.

\textsuperscript{42} See Feinberg et al., \textit{Final Report of the Special Master} at 83-84; Feinberg, \textit{The Building Blocks, supra} n. 9; Rabin & Sugarman, \textit{The Case for Specially Compensating the Victims of Terrorist Acts, supra} n. 8 at 913.

\textsuperscript{43} See Rabin & Sugarman, \textit{The Case for Specially Compensating the Victims of Terrorist Acts, supra} n. 8 at 914.

\textsuperscript{44} Id.
approaches seem entirely unsuitable where a mass tort occurs and there is a readily ascertainable culpable defendant.\(^\text{45}\)

In contrast to these limiting arguments, other scholars have argued that there is no reasoned basis for distinguishing between innocent victims of the WTC attacks and the innocent victims of other similar disasters which also have caused national trauma.\(^\text{46}\) If the concepts of “innocent victim” and “national trauma” have meaning, then there is little rationale basis for choosing among types of claimants for fund relief.\(^\text{47}\) Thus, in this view, the creation of the WTC Fund was inherently unfair to victims of the first attack on the World Trade Center in 1993, the victims of the Oklahoma federal office bombing (a domestic terrorist event), the victims of the attacks on the Navy ship Cole in Yemen, and the victims of the embassy bombing in Kenya.\(^\text{48}\) In this same vein, these critics argue that there is no reasoned basis for not extending fund compensation to innocent victims of natural disasters, such as the innocent victims of Hurricane Katrina.\(^\text{49}\)

Despite the debate concerning the nature of the events that support creation of a fund approach to compensation (or not), those commentators who have addressed this issue do seem to agree on this point: that a mass disaster traceable to the actions of a responsible party, that gives rise to legal liability, is not the sort of scenario that justifies creation of a fund.\(^\text{50}\) In other words, the events surrounding the BP Gulf oil spill rather precisely characterize the type of disaster that most commentators agree should not lead to creation of a fund.

B. Authorization for the Funds

Just as the events that gave rise to the WTC Fund and the Gulf Coast Claims Facility differ, so do the authorization for each of these funds. Congress authorized the creation of the WTC Victims’ Compensation

\(^{45}\) See Rabin, The September 11th Victim Compensation Fund, supra n. 8 at 780–81, 798, 799–803 (suggesting that responsible defendants ought to be charged with the losses reflecting what is required to make a deserving plaintiff whole; “I remain unconvinced that any future special recognition of victims of terrorism outside tort would, or should, depart from the norm.”).

\(^{46}\) See Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 79 (suggesting that the status of victims cannot be used to justify the enactment of a unique compensation statute); Alexander, Procedural Design, supra n. 5 at 653–54; Rabin, The Quest for Fairness, supra n. 11 at 588.

Fund by a federal statute enacted eleven days after the World Trade Center attacks. The enabling statute performed several functions: it limited the liability of the airlines, created the compensation fund, and authorized the appointment of a special master to administer the fund. Although Congress enacted the legislation with unprecedented speed, the relevant Congressional committees nonetheless entertained witness testimony and received legislative suggestions from various interested groups and individuals.

In creating the World Trade Center VCF, the theme of national tragedy was central to the legislation’s purpose. Hence, the source of compensation funds for World Trade Center victims was to come from the federal treasury and taxpayer monies; the concept of a national tragedy was used to justify calling upon all American citizens to contribute in a communal fashion to help innocent fellow Americans in a time of calamity.

51. See Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 3-4; Ackerman, The September 11th Victim Compensation Fund, supra n. 8; Alexander, Procedural Design, supra n. 5 at 627-28, 630-633 (legislative history of ATSA); Steenson & Sayler, The Legacy of the 9/11 Fund, supra n. 14 at 534 et seq.

52. Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 3-4; Ackerman, The September 11th Victim Compensation Fund, supra n. 8; Alexander, Procedural Design, id. at 636-38; 5. According to the caption of the ATSSSA, the Act was designed “[t]o preserve the continued viability of the United States transportation system.” Id. Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 1.

53. Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 3-4; Ackerman, The September 11th Victim Compensation Fund, supra n. 8; Alexander, Procedural Design, id. at 630-31. Title IV of the Act, which created the Victims’ Compensation Fund, was designed to reduce lawsuits against the airlines for their alleged failure of due care in preventing or reducing the harm from terrorist attacks.

55. See Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 2. Berkowitz criticizes the haste with which Congress enacted the legislation, suggesting that “Despite its practical and noble intentions, the ATSSSA, and the Fund in particular, is a hastily constructed legislative patchwork that fails on a variety of counts.” Id.

56. 59. See ATSA, 115 Stat. 230, 240 (2001). In creating the Fund, Congress stated that
The Gulf Coast Claims Facility, in contrast, has a less clear and more ambiguous genesis.\textsuperscript{60} Indeed, it is difficult to pinpoint the precise legal authorization for the Gulf Coast Claims Facility, and the parties involved and commentators have suggested different sources of authority.\textsuperscript{61} Shortly after the oil rig explosion on April 20, 2010, the Coast Guard designated BP as a “responsible party” under the Oil Pollution Act.\textsuperscript{62} This designation as a “responsible party” triggered a duty on the part of BP to pay for all costs related to the oil spill and its clean-up.\textsuperscript{63}

Pursuant to this designation, BP set up numerous claims offices throughout the Gulf Coast states, hired hundreds of claims processors, and paid walk-in claims for approximately two months.\textsuperscript{64} Little is known or publicized about the hiring and training of these claims adjusters. The Oil Pollution Act does not, by its terms, require creation of a claims facility or a fund or any other mechanism for victim compensation; the Act is entirely vague concerning how a responsible party must satisfy its duties under the Act.\textsuperscript{65} Thus, against the backdrop of this vague statutory whatever compensation awards the special master granted were “the obligation of the Federal Government.”

\textsuperscript{60} See Kate Baxter-Kauf and Brett Mares, Environmental Justice Implications of the Efforts to Provide Compensation for Victims of the BP Oil Spill at 6 (Nov. 1, 2010) (submitted to the National Commission on the BP Deepwater Horizon Spill and Offshore drilling) (“It remains unclear whether the GCCF was instituted under the regulatory purview of the OPA. Though it shares many characteristics with the fund structure established by federal regulations, neither BP nor the federal government has definitively stated that the OPA controls the GCCF’s function.”)

\textsuperscript{61} See e.g., Statement of Kenneth Feinberg, Full Hearing on Recovery in the Gulf: What the $20 Billion BP Claims Fund Means for Small Business, Hearing before the Committee on Small Business, United States House of Representatives, 111th Cong. 2d Session (June 30, 2010) (“This is a purely private facility. It is not a facility of the federal Government or a subfacility of an agency. It is a private compact creating this independent facility which I will design and administer.”).

\textsuperscript{63} Id. The Coast Guard “directed BP to maintain a single claims facility for all Responsible Parties to avoid confusion among potential claimants.”

\textsuperscript{64} See BP Press Release, BP to Appoint Independent Mediator to Ensure Timely, Fair Claims Process (May 26, 2010), available at http://www.bp.com/genericarticle.do?categoryID=2012968&contentID=7062448; BP Press Release, How to Claim Money from BP’s $20 Billion Fund (June 18th, 2010), available at http://walletpop.com/2010/06/18/how-to-claim-money-from-bps-20-billion-fund/ (describing BP’s prior processing of claims through the auspices of its contractor ESIS, and that BP made the determination whether to pay claims; indicating that under new ICF facility award decisions would be made available to hear appeals from award determinations.); BP Creates Special Team to Speed Up Claim Payments, ABC News (Aug.3, 2010), available at http://abcnews.go.com/business (reporting that BP was encouraging businesses to contact their adjuster or BP to process claims).

\textsuperscript{65} See GCCF Protocol for Emergency Advance Payments, supra n. 62 (“Under the OPA, Responsible Parties must establish a claims process to receive certain claims by eligible
mandate, various commentaries have suggested that this initial BP claims process between May and August 23, 2010 was chaotic, ad hoc, unsystematized, and largely unregulated. And, these initial BP claims efforts experienced numerous complaints by frustrated and angry applicants.

Nearly two months after BP had created an ad hoc claims processing effort in the Gulf States, executives from BP and President Obama agreed on June 16, 2010 that BP would contribute $20 billion to rectify claims as a consequence of the rig explosion and resulting oil spill. This sum was to be paid into an escrow account to cover BP's ongoing and future liabilities. Although the $20 billion amount was widely reported in the media, BP did not actually place this entire amount into escrow. Instead, only $3 billion was transferred to an account.

Through a controversial but little noticed agreement with the President, BP's remaining obligations pursuant to this $20 billion commitment are to be funded, in the future, by BP's ongoing oil drilling revenues, largely derived from its offshore drilling efforts in the Gulf.

66 But see Strassel, Mr. Fairness, supra n. 3 (praising BP's initial compensation efforts). Feinberg took over the GCCF from BP on August 23, 2010. See BP to Stop Handling Claims Relating to Gulf Spill on Wednesday, AP (Aug. 17, 2010) (BP announces it had paid approximately $368 million to individuals and businesses, excluding governmental entity claims).

67 BP Creates Special Team to Speed Up Claim Payments, ABC News (Aug. 3, 2010), available at http://abcnews.go.business (reporting that BP was encouraging businesses to contact their adjuster or BP to process claims); Kaufman, Feinberg Vows Quick response on Gulf Oil Spill Claims, supra n. 7 (irate criticisms of Louisiana residents to BP payouts); See Campbell Robertson, As Claims for Oil Spill Losses Shift to Administrator, Queries Follow, N.Y. Times (Aug. 23, 2010) (“Dealing with BP . . . has been a nightmare.”).

68 Thomas Perrelli, Associate U.S. Attorney General, purportedly led negotiations with BP to set up the, claims facility. See Jim Snyder, Feinberg to Meet U.S. Senator as Complaints Mount Over BP Claims, Bloomberg Businessweek (Sept. 28, 2010).

69 See Press Release, BP Establishes $20 Billion Claims Fund for Deepwater Horizon Spill and Outlines Dividend Decisions (June 16, 2010), available at http://www.bp.com/genericarticle.do?categoryID=2012968&contentId=7062966. The BP Press release announced that Ken Feinberg would administer the Independent Claims Facility; that funds would be available to satisfy “legitimate claims,” that the ICF would adjudicate all OPA claims and tort claims, excluding federal and state claims. BP also indicated that the fund did not cap its liability, but that money left over in the fund once all legitimate claims were resolved would revert to BP. See also, White House Blog, A New Process and a New Escrow Account for All Oil Spill Claims from BP (June 17, 2010), available at http://www.whitehouse.gov/blog/2010/06/17/a-new-process-and-a-new-escrow-account. The White House blog indicated that the facility would develop standards for recoverable claims that would be published, and that a panel of three judges would be available to hear appeals of the administrator’s decisions.

70 BP Press Release (June 16, 2010), id.

71 BP Press Release (June 16, 2010), id.

72 See Monica Langley, U.S., BP Near Deal on Fund, W.S.J. (Aug. 10, 2010), available
This largely unnoticed arrangement has made the federal government, in effect, future partners with BP in assuring continued offshore oil drilling in the Gulf.\(^73\) Indeed, when the federal government subsequently sought a moratorium on offshore oil drilling in the Gulf,\(^74\) the government's side-deal with BP regarding funding of the escrow account placed the federal government in conflict with the interests of future claimants in seeking compensation, because continued funding of those compensation obligations are contingent on BP's ability to continue deep-sea offshore and other drilling in the Gulf.\(^75\)

Although there was extensive media coverage of BP's agreement with President Obama to place $20 billion in escrow, the precise legal basis for this agreement is unclear.\(^76\) There is no Executive Presidential Order creating the fund; nor is there any official governmental order authorizing the Gulf Coast Claims Facility. It is difficult to ascertain what parties were present when President Obama consummated this deal. Unlike the World Trade Center VCF, there is no Congressional statutory enactment undergirding the GCCF. In fact, Congress held no hearings to lay the groundwork for creation of a fund, nor was Congress involved at all in the creation of the GCCF. In the same vein, there is no Executive Order or Congressional legislation creating a fund administrator or

---

\(^{73}\) See Langley, *BP Near Deal on Fund*, id. ("If this unusual deal is inked, it would represent a new level of interaction between BP and the federal government. Both sides have been tied together, for good or bad, since the Deepwater Horizon rig sank in April."). This BP agreement with the President is highly similar to the pact that the state Attorney Generals entered into with tobacco company defendants in settling the state AG lawsuits against tobacco companies for reimbursement for tobacco-related health injuries as a consequence of the sale of tobacco products to citizens. Under the terms of the Master Settlement Agreement with the tobacco companies, the tobacco defendants' ongoing financial liabilities to state treasuries are to be paid out of future tobacco sales revenues. It has largely gone unnoticed that the tobacco Master Settlement Agreement with the States has effectively made the States stakeholders in the future well-being of the tobacco companies, with regard to the manufacture and sale of tobacco products. The state treasuries get paid their settlement shares as long as the tobacco companies can sell cigarettes and other tobacco products in those states. Similarly, BP has promised to fund the GCCF from future, ongoing oil production revenues.

\(^{74}\) See Clifford Krauss and John M. Broder, *BP Says Limits on Drilling Imperil Spill Payouts*, N.Y. Times (Sept. 2, 2010) (BP signaled its reluctance to cooperate with fines and fund payments unless it is able to continue to operate in the Gulf of Mexico; concern over drilling overhaul bill passed by House on July 30, 2010).

\(^{75}\) Id.

\(^{76}\) See Neil King Jr., *Feinberg Ramps Up $20 Billion Compensation Fund*, W.S.J. (June 21, 2010), available at http://online.wsj.com/article/SB100014240527487042563-04575321, noting that fund was created as a "voluntary compact" but without any act of Congress, executive order, or other legal anchor).
appointing a special master to oversee, manage, and administer the GCCF.\textsuperscript{77}

The legal basis for the Gulf Coast Claims Facility remains obscure, murky, and uncertain. In Congressional hearings after BP selected Ken Feinberg as the attorney to oversee the fund,\textsuperscript{78} Feinberg explained to a Congressional subcommittee that he was operating pursuant to a “compact.”\textsuperscript{79} Feinberg was not asked, nor did he explain, what he meant by this “compact,” and indeed, there is no evidence in any public or private records of a “compact” authorizing creation of the GCCF or appointing Feinberg. And, in subsequent colloquies, Feinberg abandoned this “compact” conceit and instead vaguely suggested that he was operating under the authority of the Oil Pollution Act.\textsuperscript{80} But, at the time of his selection to oversee the GCCF, Feinberg seemed unaware of the OPA, and he certainly did not indicate that his authority derived from that Act.\textsuperscript{81}

C. Implementing Standards and Regulations

Because the statute authorizing the creation of the WTC Fund lacked specific detail with regard to implementing standards, one of Ken Feinberg’s first tasks after his appointment as the special master to oversee the Fund was to create standards and regulations to govern claimant compensation.\textsuperscript{82} Over the course of the Fund’s existence, two different approaches to creating standards and regulations emerged during the WTC Fund experience. The first approach embodied legal formalism; the second embraced a free-form, \textit{ad hoc} discretionary pattern.

Thus, the initial promulgation of rules and standards to govern the WTC Fund was subject to the federal rulemaking process, complete with

\footnotesize{
\textsuperscript{77} See Strassel, \textit{Mr. Fairness}, supra n.3 (reporting that, according to Feinberg, “the administration and BP got together . . . and decided, both, that coming up with a guaranteed sum to pay eligible claims was a creative alternative to years of protracted litigation.”).

\textsuperscript{79} See Statement of Kenneth Feinberg, supra n. 61.

\textsuperscript{80} See Brian J. Donovan, BP Oil Spill Victims: Gulf Coast Claims Facility, Litigation or Oil Spill Liability Trust Fund?, Countercurrents.org (Nov. 16, 2010), http://www.countercurrents.org/donovan161110.htm.

\textsuperscript{81} See Statement of Kenneth Feinberg, supra n. 61 at 4.

\textsuperscript{82} Feinberg \textit{et al.}, F\textit{INAL REPORT OF THE SPECIAL MASTER} at 4–7; ATSA, § 407 (2001). See Ackerman, \textit{The September 11th Victim Compensation Fund}, supra n. 8 at 148–156(describing administrative rulemaking process after enactment of ATSA); Alexander, \textit{Procedural Design}, supra n. 5 at 661; Berkowitz, \textit{The Problematic Role of the Special Master}, supra n. 18 at 2: “Congress failed to set bright-line rules, enunciate exclusionary definitions, or articulate a principled system of compensation. There is simply no “rationale, restraint, ethic or coherence” in the definition of awards, leaving the Special Master unilaterally responsible for filling in nearly every detail of the program.” \textit{Id.}
}
a standard "Notice and Comment" period for proposed regulations. In this capacity, Feinberg and his staff worked with Congressional subcommittees and other experts to draft proposed standards and regulations to govern the claims process. Interim proposed standards, regulations, governing criteria, as well as sample compensation scales, were published for prospective claimants to review. During this notice and comment period, the Justice Department received more than eight hundred comments on the proposed regulations to implement the Fund. After the comment period had expired, and all comments purported were reviewed by Feinberg's staff, Feinberg issued final regulations governing the claims process.

However, the resulting standards that were issued as a consequence of this federal rulemaking turned out to be less firm and "final" in comparison to other federal rulemaking. In commenting on Feinberg's

84 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 4-5.

85 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 5-7; Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 149-55, 210-11; see e.g., September 11th Victim Compensation Fund, Presumed Economic Loss Calculation Tables (2002), http://www.usdoj.gov/archive/victimcompensation/vc_matrices.pdf. See also Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 11 (describing the process of generating the tables).

87 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 5; September 11th Victim Compensation Fund of 2001, Final Rule, 67 Fed. Reg. 11,233 (March 13, 2002) (codified at 28 C.F.R. pt. 104), available at http://www.usdoj.gov/archive/victimcompensation/finalrule.pdf. But see Schneider, Grief, Procedure, and Justice, supra n. 19 at 489 (criticizing establishment of the Fund and appointment of Special Master as undemocratic; noting that September 11th families were given little opportunity to shape the process and the selection of the administrator, although there were many comments on the Interim Final Rule posted on the website).

88 See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 152, commenting on the final rule for calculating awards: "The Special Master thereby gave himself flexibility to depart from his formulaic methodology where he felt the circumstances warranted."
rules, one critic noted that "All of Feinberg's regulations, whether restrictive or expansive, exhibited his vast discretion. He construed his grant of authority to include few governing standards and pointedly rejected the idea that he was obligated to provide reasoned explanations for his decisions." 89

Thus, a second discernable characteristic of the WTC Fund was that the "final rules" governing the Fund turned out to be rather elastic and changeable. Indeed, as will be seen below, a signal characteristic of the Fund's implementation was Ken Feinberg's frequent modification of announced rules and standards, often in response to angry challenges from different aggrieved claimants. 90 When confronted with new complaints and grievances, Feinberg then arrogated to himself the rulemaking process, which rule modifications were not subject to the notice-and-comment procedure that had occurred at the outset of the Fund. Hence, although the WTC Fund was launched with a formalism befitting a federal statutory program, it quickly deteriorated into something resembling *ad hoc*, on-the-fly rulemaking by its special master. 91

The different ways in which standards, rules, and regulations were generated to govern WTC Fund have bearing on an assessment of the WTC Fund's ultimate legitimacy. 92 At the outset, the federal notice-and-comment rulemaking approach provided the WTC Fund with an aura of participatory democracy and legality. 93 However, as implementation of

90 Ackerman, *The September 11th Victim Compensation Fund*, supra n. 8 at 155 ("Some victims' families seemed to fault the Special Master for failing to arrive at an award figure that could actually represent the monumental loss they had suffered . . ."); Diller, *Tort and Social Welfare Principles*, supra n. 15 at 739–40.

91 Berkowitz, *The Problematic Role of the Special Master*, supra n. 18 at 11. In commenting on regulations promulgated pursuant to his delegated authority, Berkowitz has suggested of Feinberg: "He can act sua sponte, devising his awards as he pleases, disregarding the economic and emotional needs of vulnerable families, and issuing regulations to enforce is discretion." *Id.* at 11.

92 Cf. Ackerman, *The September 11th Victim Compensation Fund*, supra n. 8 at 149 (contending that Feinberg's rulemaking process reflected several values of democratic governance) with See Ackerman, *The September 11th Victim Compensation Fund*, supra n. 8 at 206, citing Richard C. Reuben, *Democracy and Dispute Resolution: The Problem of Arbitration*, 67 Duke J. of Law & Contemp. Probs. 279, 285–86 (2004); Priest, *The Problematic Structure*, supra n. 15 at 545 ("The September 11th Fund will remain controversial because the source of the definition of its awards—however able and committed—is not in any sense democratic. Coupled with the lack of an internal rationale or constraint, the awards granted by the Fund will continue to remain problematic."). Other commentators have suggested that the WTC Fund signaled the beginning of a "broad regressive trend." See Conk, *Will the Post 9/11 World be a Post-Tort World?*, supra n. 24 at 253.

93 Ackerman, *The September 11th Victim Compensation Fund*, *id.* at 149, 208; Feinberg, *Transparency and Civil Justice*, supra n. 7 at 474–75 (outreach to victims during rulemaking process).
the Fund progressed, the formalistic rulemaking processes were jettisoned in favor of ad hoc, discretionary decision-making by a single all-powerful special master, subject to weak (if non-existent) review.94

In implementing the WTC Fund, at least four forces converged as the impetus to abandon formal rulemaking and acquiesce in the special master’s ad hoc rulemaking. First, the special master realized that the universe of potential Fund claimants was relatively small, and that his source of compensation funding—the entire federal Treasury95—was essentially infinite.96 Thus, the special master realized he would be able to satisfy any and all claims, including expanded grounds for those claims. Against this backdrop, Feinberg could operate as a heroic special master by capitulating to the demands of angry claimants that he modify or change announced standards in liberal favor of the claimants.97

---

94 See generally Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 156–179 (describing and analyzing various criticisms of the WTC Fund and its administration); Chamallas, The September 11th Victim Compensation Fund supra note 5, at 57 (“Under the broad Congressional mandate, the Special Master of the Fund has enormous discretion, more than usually given to a judge or jury”); cf. George L. Priest, The Problematic Structure of the September 11th Victim Compensation Fund, 53 DePaul L. Rev. 527, 545 (2003) (criticizing the standards of WTC Fund awards as non-democratically promulgated); Steenson & Sayler, The Legacy of the 9/11 Fund, supra n. 14 at 534 (Feinberg’s untrammelled discretion not subject to Congressional or administrative oversight). In commenting on his sizeable discretion, Feinberg noted: “And Congress in its infinite wisdom added a fourth requirement: the Special Master will exercise his discretion to see that justice is done. Congress delegated to me: “Make sure that this works. Use your discretion to make it work. We do not know what we are getting into, so take it from here.” Feinberg, Negotiating the Victim Compensation Fund, supra n. 9 at 23. See also Alexander, Procedural Design, supra n. 5 at 667–68, criticizing Feinberg’s expansive rulemaking authority in administering the WTC Fund:

Nevertheless, this structure should not be adopted for future compensation programs. Combining legislative and adjudicative powers in a single person, and making that person exempt from any administrative or judicial review, can lead to conflicts of interest, blind spots, poor organization, and the appearance of arbitrariness or bias. Institutional design should not depend, on finding a single individual with a unique set of talents and experience; rather, it should assist whoever is assigned to the institution to make good decisions.

95 Chamallas, The September 11th Victim Compensation Fund supra note 5, at 55; Rabin & Sugarman, The Case for Specially Compensating the Victims of Terrorist Acts, supra n. 8 at 907, 909.

96 Priest, The Problematic Structure, supra n. 15 at 544 (“... there is no constraint under on awards under the September 11th Fund. Its budget is unlimited, and its definitional principles vague. It is therefore not surprising that many victim families have argued for larger awards.”); Rabin & Sugarman, The Case for Specially Compensating the Victims of Terrorist Acts, supra n. 8 at 907–08 (“... funding of the 9/11 plan was open-ended so that the Special Master was not provided with any aggregate limit on the compensation that might be paid out to victims of the disaster.”).

97 Diller, Tort and Social Welfare Principles, supra n. 15 at 747; Priest, The Problematic Structure, id. Commenting on this phenomenon, Professor Diller observed:

Whether due to settlement or the actual threat of bankruptcy of defendants, administrators of mass tort settlement funds are placed in the position of allocating
Second, Feinberg also recognized that virtually none of his actions would be subject to meaningful judicial or Congressional review. As such, he could modify existing promulgated rules and standards without significant fear of challenge, repercussions, or review. Third, with every progressive rule modification that the special master announced that went unchallenged, the special master became further empowered to do whatever he thought best, expedient, or just, in his own view. With unlimited funding, the special master became the dispenser of generous largesse. In turn, Feinberg also understood that capitulation to claimant demands, and the provision of compensatory largesse, effectively bought-off claimant dissatisfaction.

Finally, during administration of the WTC Fund claims process, the universe of claimants discovered that Feinberg was willing to acquiesce and capitulate to their demands if those demands were pressed insistently enough in the public domain as well as other forums. Thus, over time the WTC Fund processes locked its claimants and the special master in an interesting psychological synergy, whereby the claimants could achieve their liberal compensation goals and Feinberg could emerge as the empathetic, heroic special master, without consequence to either party. Although scholars have discussed the psychological ramifications a fixed amount among a large number of claimants. The Fund does not present this problem, as it has no cap. Ironically, the open-ended nature of the Fund makes its administration more difficult because the Special Master cannot parry discontent about awards with claims that he would have liked to have awarded more but that the Fund is simply inadequate. Absent such a limit, he cannot play claimants off against each other, but must be prepared to justify each award as an appropriate amount of compensation on its own terms.

98 Alexander, *Procedural Design*, supra n. 5 at 667; Berkowitz, *The Problematic Role of the Special Master*, supra n. 18 at 14–16 (noting that Feinberg had the ability to oversee the review of his own awards, both theoretically and operationally); Steenson & Sayler, *The Legacy of the 9/11 Fund*, supra n. 14 at 534–35.

99 Feinberg, *The Building Blocks*, supra n. 9 at 276 (noting the average WTC Fund award was $1.8 million: “Just give every victim $1.8 million of the taxpayers’ money, tax free. There won’t be any mass torts.”); Rabin & Sugarman, *The Case for Specially Compensating the Victims of Terrorist Acts*, supra n. 8 at 907–08.

100 Id.

101 Describing his program for the success of the WTC Fund, Feinberg indicated:

So that, in capsulized form, is the way the program worked. The recipe for success was pretty clear: make very generous payments; outreach to families; keep going after them and corral them; let them know that there are no tricks, and that there is nothing hidden here. This is a transparent attempt by the American people to help. Offer due process considerations. Give everybody the opportunity to be heard. Make yourself available. Reach out to these people. It worked."

Feinberg, id. at 27.

102 A good deal of Feinberg’s reflection on his efforts is devoted to his descriptions of demonstrating empathy for the WTC claimants’ concerns. See Feinberg, *Negotiating the Victim Compensation Fund*, supra n. 9 at 27.
of the World Trade Center events for victims of the disaster, scarce attention has been paid to the motivations driving a much-heralded,singular justice-provider, who possesses increasingly god-like powers.

The WTC Fund experience with the promulgation of standards and regulations governing claim compensation provides an interesting contrast to that of the Gulf Coast Claims Facility. Because the GCCF was not authorized pursuant to Congressional enactment or Executive branch oversight, the creation of criteria governing the GCCF claim process was subject neither to formal or informal rulemaking. Simply, the GCCF is a largely privatized enterprise not subject to public legitimacy constraints.

As best as can be ascertained, Ken Feinberg and his staff made no background study of proposed standards for the GCCF prior to the announcement of rules, or if they did, they made scant effort to publicize their efforts. Indeed, due to a lack of transparency, it is difficult to know who has been responsible for drafting the GCCF protocol rules, what sources have been relied on in drafting standards, and which parties have participated (if any) in the process. The administrator made scant

104 See discussion and criticisms of Feinberg as an unfettered, unaccountable administrator, infra at Part II.D.3.

105 Strassel, Mr. Fairness, supra n. 3 (reporting that Feinberg expected to issue ground rules for claims by the middle of August; still "noodling" over specifics").

106 See White House Elog, A New Process and a New Escrow Account for All Oil Spill Claims from BP (June 17, 2010), available at http://www.whitehouse.gov/blog/2010/06/17/a-new-process-and-a-new-escrow-account. The White House blog indicated that the facility would develop standards for recoverable claims that would be published, and that a panel of three judges would be available to hear appeals of the administrator's decisions.

Among the numerous transparency issues enmeshed in the GCCF, there is no indication in the public domain concerning who has staffed Feinberg's offices or facilities, and who has been involved with drafting standards, settling claims, or reviewing internal appeals. Nor is there any documentation concerning the credentials and experience of GCCF staff. In addition, there is no documentation of the nature and level of training afforded persons working under Feinberg's supervision in administering the GCCF. See Alexander, Procedural Design, supra n. 5 at 669, criticizing the lack of transparency in the selection of Feinberg's staffers to administer the WTC Fund: "There were no published criteria for the selection of Special Master's subordinate adjudicators. Though the individuals selected had impressive resumes, the list was criticized for including "too many corporate defense lawyers and too many people plucked from Mr. Feinberg's Rolodex of friends, former colleagues, and fellow mediators."

107 See discussion of lack of transparency in implementation of the GCCF, infra at Part II.C.2. See also Neil King Jr., Feinberg Criticized for Spill-Compensation Terms, W.S.J. (Aug. 24, 2010) (contention that Feinberg was laying down rules for the claims fund with little input from the states most affected).

108 King, Feinberg Criticized, id. See also, The Gulf Claims Racket; The Lawyers Are
effort to publish proposed protocol rules and regulations in advance of their implementation. And, although Feinberg made well-publicized tours of Gulf coast towns in the weeks after the oil spill and held several “town hall” meetings, he nonetheless did not provide for a formal public notice-and-comment on proposed standards. Instead, he seemed to suggest that these “town meetings” somehow served as a surrogate for a notice-and-comment regime. In the absence of formal rulemaking, Feinberg’s staff issued emergency and final protocol rules governing the GCCF.

On the other hand, following the arc of his experience with the WTC Fund, Feinberg in administering the GCCF quickly segued into the rulemaking model that evolved in administering that WTC Fund. Thus, skipping over any formal rulemaking process for the GCCF, Feinberg resorted to the same ad hoc decision-making model that characterized his supervision of the WTC Fund in its later stages. And, similar to the WTC experience, once a set of rules were set forth in the public domain, Feinberg repeatedly defaulted to a pattern of concessions, amendments,

*Upset They Aren’t Getting more of the Action*, W.S.J. (Aug. 26, 2010) (reporting that the State Attorneys General for Alabama, Mississippi, and Florida had taken “Mr. Feinberg behind the woodshed for a couple of hours to express our concerns about the draft claims protocol he had circulated.”).

Kaufman, *Feinberg Vows Quick Response*, id. (town meeting in Houma, Louisiana where local residents complain of fuzzy details of Feinberg’s claims-processing standards: “I’ve seen your little paper and stuff, but it doesn’t say what will be deducted” . . . “Just the same thing BP did, when it came to the claim, no one knows how it works. And there is not paper stating how. I would like something in my hand.”); *Feinberg Releases “Emergency Protocol’ for BP Oil Spill Claims*, al.com (August 20, 2010), available at http://blog.al.com. (reporting Feinberg’s early release of emergency payment protocol; Feinberg stating that the guidelines were the result of many town hall meetings throughout the Gulf, listening to people affected by the disaster.”).

and modifications in response to constituent challenges. However, in contrast to the WTC Fund, Feinberg’s on-the-fly rule modifications in administering the GCCF have been made in response to objections and requests not only from claimants, but from BP itself.

The reasons for the administrator’s decisions to act in this fashion are speculative, but follow the trajectory of the WTC Fund experience. Once again, Feinberg is functioning in a setting where he believes he has unlimited financial resources to compensate the universe of claimants. And, even more pronounced than the WTC Fund setting, Feinberg is accountable to no one and subject to virtually no review. In this setting, the psychological motivation to prevail as the celebrity administrator of the Gulf Coast oil calamity presents an enormous ego-driven temptation, which in turn is conducive to heroic gestures of sympathy, largesse, and ad hoc justice.

As discussed above, the WTC Fund and the GCCF provide contrasting models of rulemaking to implement the funds’ compensation schemes. The three following examples illustrate the ways in which Feinberg, as the special master overseeing the WTC Fund and as administrator of the GCCF, developed and implemented detailed programmatic rules for each fund.

1. Eligibility

The federal legislation authorizing creation of the WTC Fund provided only general guidance concerning who would be an eligible claimant to the fund. The statute provided compensation from the fund for any person who had suffered physical harm or death at the scene of the crashes, aboard the planes, at the time or in the immediate aftermath of the crashes. After Congress enacted the enabling statute, however,

115 See Urbina, BP Settlements Likely to Shield Top Defendants, supra n. 109 (BP influence on scope of waiver and release, requiring GCCF fund claimants to waive right to sue not only BP, but all other major defendants involved with the spill).

116 Feinberg has made repeated protestations of his complete independence in administering the GCCF. See discussion of Feinberg’s independence and conflict-of-interest challenges, infra at Part II.D.4.

117 See discussion of Feinberg’s lack of accountability and review in administering the GCCF, infra at Part II.D.3-4.

118 See generally Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 18-29; Feinberg, Negotiating the Victim Compensation Fund, supra n. 9 at 22; Steenson & Sayler, The Legacy of the 9/11 Fund, supra n. 14 at 540-41.

119 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 19-22; ATSA at § 405(c)
the general eligibility requirements were further refined through a notice and comment rulemaking process.\textsuperscript{120} Over the months of debate surrounding eligibility requirements, Special Master Feinberg concluded that the Fund had to align its eligibility requirements with state law to avoid conflicts with the administration of a decedent's estate.\textsuperscript{121}

Pursuant to the rulemaking process, eligibility requirements for making a claim in the WTC Fund were refined to embrace definitions of who was a legal representative\textsuperscript{122} and what constituted the "vicinity" of the disaster sites.\textsuperscript{123} Regulations also refined the statutory criteria of "immediate aftermath"—limiting claims to a twenty-four hour reporting period after the incidents—and "physical harm."\textsuperscript{124} As a consequence of various regulations, eligibility was thus both geographically and temporally circumscribed. The types of claims eligible for compensation also were limited to personal injury and wrongful death causes of action.\textsuperscript{125} Future claimants for exposure-only injuries (such as respiratory ailments) were notably excluded.\textsuperscript{126} In addition, property damage,
business interruption, other non-tortious claims were excluded, as well as claims for emotional trauma and distress.

The WTC Fund quickly became enmeshed in several disputes concerning the definition of eligible claimants, focusing on who constituted a legal representative eligible to pursue and recover a claim. Numerous disputes emerged among contending family and non-family members. The legal status of unmarried partners, non-resident aliens, as well as illegal aliens to recover under the WTC Fund was hotly contested. Furthermore, competing family members argued over allocation of awards among family members. Some people objected to the under-inclusiveness of the Fund in failing to provide for victims of other terrorist acts. As indicated above, despite the existence of promulgated rules that restricted claimant eligibility, Special Master Feinberg—on his own authority and in response to public challenges—relaxed these eligibility requirements, most notably for unmarried partners and undocumented aliens.

In contrast, eligibility for making a claim in the GCCF has not been subject to broad authorization by federal statute creating the facility, nor by Executive Order. Eligibility is only remotely derived from the OPA, which does not by its terms indicate which parties or entities are eligible for compensation after the Coast Guard designates a “responsible party” as the consequence of an oil spill disaster. In this legislative vacuum, Feinberg as the GCCF administrator has arrogated to himself and his staff the power and authority to determine eligibility for compensation.

- 45 -
From the outset, eligibility for compensation from the GCCF has been governed by a combination of published standards and shifting pronouncements from the administrator. Before the formal opening of the GFFC in August 2010, BP handled claims on a walk-in ad hoc basis at various locations on the Gulf Coast. The ad hoc nature of the BP claims processing efforts inspired numerous complaints about the lack of standards and inconsistency in claim processing.

The formal commencement of the GCCF marked an effort to bring order to claims processing, including eligibility criteria. From the outset, and as early as August 16, 2010, administrator Feinberg publicly mulled over eligibility criteria for claimants, with considerable controversy centered on the concept of “proximity.” Initially, Feinberg announced that he was skeptical that remote inland claims would be eligible for compensation from the facility. Indeed, Feinberg reflected that his WTC Fund efforts had been simplified by the geographic constraints imposed on eligibility for that fund.

---

136 See id. The protocol for emergency payments indicated:
The GCCF will only pay for harm or damage that is proximately caused by the Spill. The GCCF’s causation determination of OPA claims will be guided by OPA and federal law interpreting the OPA and the proximate cause doctrine. Determination of non-OPA claims will be guided by applicable law. The GCCF will take into account, among other things, geographic proximity, nature of the industry, and dependence upon injured natural resources.

137 See discussion of BP’s initial handling of claims from May through August 23, supra nn. 66-67; Kaufman, Feinberg Vows Quick Response on Gulf Oil Spill Claims, supra n. 7 (criticism of BP compensation program and inconsistent awards).

138 Id. See also Mike Tolson, A Storm Brews in Alabama Over BP’s Promise; Months After the Oil Giant Promised to Pay for Losses, Many Say They Have Seen Little or Nothing, Houston Chron. (Dec. 13, 2010) (complaints over pace and extent of compensation payments; inconsistent awards).

139 See John Pacenti, Plaintiffs’ Attorneys Knock BP Fund Administrator, Daily Business Review (July 26, 2010) (Feinberg faces tough decisions on eligibility; claimants who worked on cash basis; businesses miles from the coast); Snyder, BP Spill Claims From 50 States Confront Administrator Feinberg, supra n. 39 (Feinberg reflecting on geographic standards to govern claim eligibility).

140 Snyder, BP Spill Claims From 50 States, id.; see also Urbina, BP Settlements Likely to Shield Top Defendants, supra n. 109 (discussing geographic proximity standards in proposed protocol for emergency payments); Cooper, Spill Fund Could Prove as Challenging as 9/11 Payments, supra n. 25 (emergency protocols place premium on geographic proximity to spill).

141 Snyder, BP Spill Claims From 50 States, id.; (suggesting that hotel operators 50 miles inland were unlikely to be compensated for tourism losses); Urbina, BP Settlements Likely to Shield Top Defendants, supra n. 109 (suggesting that ice cream parlors or golf courses miles from the affected shore would probably not be eligible for compensation).

142 Urbina, BP Settlements Likely to Shield Top Defendants, supra n. 109 (noting that a key difference between the spill fund and the Sept. 11th victim compensation fund is the matter of geographic proximity).
In contrast, the GCCF presented Feinberg with a large universe of claimants spread over an extensive geographic area, including the five Gulf States; but which also potentially extended beyond the Gulf States to more remote quarters. The classic example he summoned to explain his dilemma was whether a restaurant owner in Boston, Massachusetts, who relied on Gulf shrimp supplies, should be eligible for compensation from the Fund for the increased costs associated with a depleted fish supply. Feinberg repeatedly informed the media that he thought not.

In absence of clear guidelines, the argument over eligibility based on proximity did not abate. Initially, the GCCF appeared to resolve the claims of the most obvious, directly-affected Gulf persons and businesses that had been affected by the oil spill. But as it became apparent that this was not a sufficient response, Feinberg's staff attempted to address the proximity issue with the use of charts and maps delimiting the boundaries of alleged contamination and damage, as it related to claim eligibility. This approach engendered further conflict and animosity, and Feinberg and his staff eventually abandoned the charts.

As was true for the WTC Fund, over the course of several weeks Feinberg changed his mind several times about proximity eligibility, still without issuing clear standards or the rationales for those standards.

(Nov. 24, 2010), available at http://ecocentricblogs.time.com/2010/11/24/ (noting that Feinberg had "flip-flopped..."
Gulf residents, their lawyers, and local politicians severely criticized Feinberg’s proposed eligibility criteria as based on restrictive state law concepts of “zones of eligibility,” as opposed to following the OPA.\textsuperscript{151}

The initial draft protocols for emergency payments also listed a number of claims that the GCCF would not reimburse.\textsuperscript{152} These included claims for loss of property values, persons adversely affected by the Obama administration’s moratorium on Deepwater drilling in the Gulf, mental health claims, or lost tourism revenue because of government predictions that the oil slick was headed in the direction of the business.\textsuperscript{153} Other potential claimants excluded from eligibility included governmental entities, real estate agents and brokers, and businesses or individuals with a property damage claim that occurred during the “Vessels of Opportunity” program.\textsuperscript{154} In addition, certain non-OPA claims could not be recovered through the GCCF.\textsuperscript{155}

Although eligibility exclusions were gradually layered onto the facility’s criteria, administrator Feinberg—similar to the evolution of the WTC Fund—pursued a course of increasing claimant appeasement by further extending eligibility, including increasingly remote proximity claims.\textsuperscript{156} Moreover, several eligibility claims had absolutely nothing to do with proximity, at all. For example, Feinberg eventually capitulated to the interest group lobbying of the professional real estate agents, who initially were excluded from the fund.\textsuperscript{157} After considerable pressure,

(“After listening to these concerns, I have concluded that a geographic test to determine eligibility regarding economic harm due to the oil spill is unwarranted”); BP Czar: Proximity Has No Role in Payment, The Wash. Post (October 4, 2010);

157 See Snyder, BP Spill Claims From 50 States Confront Administrator Feinberg, supra n. 39 (indicating that as early as August 16, 2010, Feinberg had set aside a “modest
Feinberg—as the result of a special, political deal—carved out special treatment for the real estate agents who had been pressing claims based on the diminution of their business revenues as a consequence of a downturn in the real estate market.158 On the other hand, by December 2010, Feinberg in exasperation indicated that he could not and would not find anyone and everyone eligible.159

Moreover, eligibility requirements were intricately intertwined with proof of business claims and authentication of alleged business or property losses. The facility lacked clearly defined criteria relating to what different types of individuals and entities were entitled to relief, and what burden of production was needed to establish a basis for compensation.160 In numerous town meetings and media interviews,

amount”, which he did not disclose, to compensate Gulf State realtors, whose trade association had met with Feinberg the week before. “The realtors have “suffered a great deal” in lost sales, rent, and commissions,” [Feinberg said.]; Snyder, Feinberg to Meet U.S. Senator as Complaints Mount Over BP Claims, supra n. 68 (special deal for realtors).

158 Urbina, BP Settlements Likely to Shield Top Defendants, supra n. 109 (reporting on political deal struck with governors of Alabama and Mississippi, setting aside approximately $60 million from the fund in a special pool to compensate negatively affected real estate brokers in the gulf region who were otherwise ineligible for compensation from the fund. This money was not to be distributed by Feinberg, but rather by the National Association of Realtors in Washington D.C. or local chapters in Alabama, Florida, Louisiana, Mississippi and Texas. In addition, the national association was to set eligibility requirements—not Feinberg—although Feinberg would view those criteria): Snyder, Feinberg to Meet U.S. Senator, id. 159 Mike Tolson, A Storm Brews in Alabama Over BP’s Promise; Months After the Oil Giant Promised to Pay for Losses, Many Say They Have Seen Little or Nothing, Houston Chron. (Dec. 13, 2010) (“He said there is no strict policy on what type of claim is being honored, only that his accountants evaluate how the loss was connected to the spill. He did note that lawyers, doctors, dentists, and veterinarians were out of luck. “I can’t find anyone and everyone eligible. . . I’m doing what BP and the administration have asked of me.””).

160 But see GCCF Protocol for Emergency Advance Payment, supra n. 62 (listing what type of information needed to be submitted as proof of claims). Criticisms of implementation of the CGGF evaluation and award determinations have continued even after the GFCC promulgated protocols for final settlement of claims. See Susan Buchanan, Fishermen Dismayed Over Low Payouts in Spill Claims, Louisiana Weekly (Jan. 18, 2011):

Kevin Dean, attorney in charge of BP litigation at Motley Rice LLC in Charleston, South Carolina, pointed to similar problems faced by his firm’s clients, which include charter and commercial fishermen from Louisiana and other Gulf states. “Many of them with documented and legitimate claims have had their GCCF claims denied,” he said. On attempts by Motley Rice, which assists clients with their claims, to contact GCCF, “there’s been no one there to explain why they were rejected, so you are shooting in the dark as to how to correct or supplement the claim.”

Dean said “many of the claims adjusters seem to be temporary contractors,” lacking the will, experience or guidance to handle simple claims. Feinberg changes the rules almost daily, he said. “There’s no consistency as to how claims are processed,
administrator Feinberg reiterated that burdens of production and proof on persons seeking relief were *de minimus*, and he repeatedly stated that in the cash economy of the Gulf states, fishermen, shrimp haulers, and others similarly situated could establish their claims if their local priest vouched for them.

However, in the same fashion that the GCCF staff abandoned their proximity charts and maps, the staff also resisted actual claims-processing based on little more than vouching-in by the parish priest. As it turned out, proof of claims proved difficult for many claimants, and Feinberg repudiated his prior statements about accepting letters from local pastors as sufficient proof of claimants’ losses.

In addition, the staff gradually abandoned the ad hoc model of claims processing on an individualized basis. In order to provide at least some consistency across categories of claimants on September 25, 2010 Feinberg announced that claimants would now be “grouped” by

and much of it depends on which adjuster your claim was assigned to.”

Claims can be denied because of minor omissions, Dean said. “We did find out that one of our client’s claims—which had been under review for over eight weeks—was rejected because of a simple clerical mistake in the Social Security number. But instead of calling my office for verification or correction, they denied the claim,” he said.

161 Kaufman, *Feinberg Vows Quick Response on Gulf Oil Spill Claims*, supra n. 7 (Feinberg informing Louisiana town hall participants: I don’t need reams and reams of stuff. I don’t need a tax return, Do you have something you can show me? Well, the ship captain will vouch for me — fine. Well, my priest will — fine.”).

162 John Schwartz, *For Kenneth Feinberg, More Delicate Diplomacy*, N.Y. Times (July 16, 2010) (Feinberg indicating that the captain of the boat or the local priest could vouch-in a claimant’s work history); Kaufman, *Feinberg Vows Quick Response on Gulf Oil Spill Claims*, id.

164 See *Are Victims of the Gulf Oil Spill Getting What They Deserve?*, The Wash. Post (Nov. 25, 2010) (reporting that 175,000 people had submitted claims with inadequate documentation; Feinberg says he will not accept letters from local pastors attesting to claimants losses as proof they deserve payment; won’t replace off-the-books income in the Gulf Coast’s unofficial cash economy).

165 See Mike Tolson, *A Storm Brews in Alabama Over BP’s Promise; Months After the Oil Giant Promised to Pay for Losses, Many Say They Have Seen Little or Nothing*, Houston Chron. (Dec. 13, 2010) (complaints over inconsistent awards).
Eligibility for compensation through the GCCF entailed not only definition of eligible claimants, but also eligible claims. In this regard, the facility announced that it would handle claims relating to removal and clean-up costs, damage to real or person property, lost earnings or profits, loss of subsistence use of natural resources, and physical injury or death. The universe of potentially eligible claims, then, was substantially expanded beyond the claims resolved in the WTC Fund.

Finally, the eligibility problem had resonance in the arena of fraudulent claims. While Feinberg encouraged any and all claimants to resolve their claims through the enticement of quick and easy payments, he simultaneously began a rear-guard action against the proliferation of fraudulent claims. In administering the WTC Fund, Feinberg involved the Department of Justice to investigate and prosecute fraudulent claims. Indeed, it was a point of pride in his Final Report that only a small percentage of attempted WTC Fund claims were found to be fraudulent. Similarly, with the onset of thousands of GCCF claims, Feinberg initiated outreach to the Justice Department to assist in investigating fraudulent claims. However, in administering the GCCF, the problem of liberalizing eligibility requirements expanded the...
potential for fraud, and as such challenged Feinberg’s administration of the GCCF in ways he had not encountered in the WTC Fund.174

2. Valuation

The standards and metrics for evaluating claims in the WTC Fund and the GCCF stand in marked contrast. Early in the development of the WTC Fund, Feinberg and his staffers created compensation grids largely based on actuarial models used in insurance and tort litigation.175 These compensation grids were subject to the notice and comment rulemaking process and published for review by prospective claimants.176 Certain measures of damages, such as pain and suffering, were universally excluded from all claims, but the Fund subsequently determined to award a flat $250,000 award non-economic award for each deceased victim, and an additional $100,000 non-economic award for the spouse and dependents of deceased victims.177 The proposed grid controversially supplied award valuations only for persons making up to $250,000; for persons with earnings in excess of that amount (approximately 3% of the eligible pool of claimants), the WTC compensation chart provided no guidance for the determination of a compensation award, but imposed a presumed income cap of $231,000 a year.178

The grid valuations formed the basis for an offer from the Fund to claimants, which they either could accept or request an individualized hearing.179 In assessing the WTC Fund standards for award valuation, one commentator has suggested that not only did the Special Master not explain the basis for the schedule, but that is definition of economic loses lacked an underlying rationale.180

175 Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 184 (“What occurred in the frenzy of legislative drafting and the maelstrom of post-September 11th events was a default to familiar language. To the extent it was given any thought at all, a tort-based damages formula was a capitulation to the routine, rather than an embrace of something new and imaginative to address an unprecedented challenge”); Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 11–12.

176 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 5–9; Ackerman, The September 11th Victim Compensation Fund, supra n. 8; Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 11.

177 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 40–41.

178 Feinberg et al., The FINAL REPORT OF THE SPECIAL MASTER at 8; Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 161165 (describing problems relating to calculation of awards for higher-earners, and grievances and criticisms engendered by these claimants); Berkowitz, id.; Chamallas, The September 11th Victim Compensation Fund at 67–69.

179 Walker, Lessons That the Wrongful Death Law Can Learn, supra n. 15 at 610–612 (describing the hearing process).

180 Priest, The Problematic Structure, supra n. 15 at 540 (“...there is no coherent justification for the Fund’s definition of economic loses.”). See also Priest, id. at 543–44.
As the WTC Fund claims process evolved, and in response to increasing pressure, Feinberg modified the evaluation process to permit claimants to make individualized presentations to hearing officers based on particular circumstances. Many WTC Fund claimants requested individualized hearings, and as a consequence, WTC Fund claims administrators frequently modified the initial grid value to account for specific circumstances and special pleading. This especially was true for those claimants whose deceased relatives had high earning capacity.

In the final analysis, the WTC Fund valuation process combined a grid-based approach with highly individualized evaluation of numerous particular claims and special pleading. Some have suggested that this process not only yielded some very generous awards, but also some "strikingly inconsistent" sums. In retrospect, special master Feinberg repeatedly stated that if he had to do the WTC Fund experience over

(,arguing that the awards had no defining or constraining logic, and that the definition of the awards had been placed entirely in the hands of a special master); Rabin, *September 11th through the Prism of Victim Compensation*, supra n. 9 at 474 (describing Feinberg's ultimate compromise rules).

181 Feinberg et al., *Final Report of the Special Master* at 15–16; Rabin & Sugarman, *The Case for Specially Compensating the Victims of Terrorist Acts*, supra n. 8 at 909 (indicating that Feinberg conducted nearly 1,000 individual hearings); Feinberg, *Transparency and Civil Justice*, supra n. 7 at 475 (stating that Feinberg personally conducted 1,500 individual hearings).

182 See Feinberg et al., *Final Report of the Special Master* at 17; Ackerman, *The September 11th Victim Compensation Fund*, supra n. 8 at 218 ("The Fund's individual determinations lacked several of the formal trappings that many Americans equate with due process.").

183 See Schneider, *Grief, Procedure, and Justice*, supra n. 19 at 477 (commenting on complaints from the Cantor Fitzgerald families on the unfairness of the discretionary factors that could enter into a determination of awards).

184 See Ackerman, *The September 11th Victim Compensation Fund*, supra n. 8 at 215 (suggesting that Feinberg's *ad hoc* approach "ended up crafting a compromise that had elements of distributive justice (and perhaps practical politics) at the high and low ends, but which for the great majority of claims employed a corrective justice model."); Rabin, *The Quest for Fairness*, supra n. 11 at 583–84 (describing the compromise the Special Master reached with regard to calculating economic loss); Rabin, *September 11th through the Prism of Victim Compensation*, supra n. 9 at 474 (describing Feinberg's ultimate compromise rules).

185 Rabin & Sugarman, *The Case for Specially Compensating the Victims of Terrorist Acts*, supra n. 8 at 909 ("... the upshot is that claimants received both extraordinarily large awards and at the same time strikingly different sums: Death benefit awards averaged $2.1 million, and ranged from $250,00 to $7.1 million."); see also Schneider, *Grief, Procedure, and Justice*, supra n. 19 at 477:

Feinberg has made the program "his," and the fact that there is one decision maker with so much discretion increases perceptions of unfairness. Making the program "his" has all sorts of problematic dimensions. It leads to a sense that he will make individualized "deals," and indeed, he does. Lawyers can claim to trade on "insider" access to, or contact with, him.

- 53 -

http://digitalcommons.law.lsu.edu/mli_proceedings/vol58/iss1/7
again, he would not have allowed for individualized compensation valuations, but would have preferred the imposition of a uniform payment for every claimant.\textsuperscript{186}

Feinberg’s insistence that a flat-rate compensation award to WTC Fund claimants would better have accorded with the dual goals of justice and efficiency is interesting in light of his subsequent administration of the GCCF. In essence, Feinberg has had the opportunity to do it again. However, to date, his resolution of Gulf claims has been a hodge-podge of individualized interim emergency payments, combined with a final settlement program that offers claimants three possible options.\textsuperscript{187} In addition, even before Feinberg assumed responsibility for administering the GCCF, there was evidence that Feinberg was giving preferential treatment to certain groups of special pleaders, such as Gulf Coast realtors, with whom he met prior to taking over management of the GCCF.\textsuperscript{188}

The emergency payment period for initial GCCF claims closed on November 23, 2010. Although there is little information available to assess the nature of these emergency payments, these payments seem to have been accomplished on an individualized, \textit{ad hoc} basis.\textsuperscript{189} In this initial phase of the GCCF, the facility paid out an aggregate $3.3 billion to approximately 251,000 claimants.\textsuperscript{190} However, roughly half of the

\footnotesize{\textsuperscript{186} Feinberg \textit{et al.}, \textit{FINAL REPORT OF THE SPECIAL MASTER} at 82; Feinberg, \textit{WHAT IS A LIFE WORTH}, \textit{supra} n. 5 at183; Kenneth R. Feinberg, \textit{Address on Insurance Compensation} after September 11, at the American Association of Law Schools Annual Meeting (2003); see also Chamallas, \textit{The September 11th Victim Compensation Fund} at 79; Rabin \& Sugarman, \textit{The Case for Specially Compensating the Victims of Terrorist Acts}, \textit{supra} n. 8 at 910 (suggesting that by rewarding families differently when their relatives had very different earning histories, Feinberg moved sharply away from a principle of treating each life as of equal value.). But see Rabin, \textit{September 11th through the Prism of Victim Compensation}, \textit{supra} n. 9 at 479–482 (noting the irony in Feinberg’s endorsement of this proposal, when in fact he tailored WTC Fund awards to individual circumstances).

\textsuperscript{187} See discussion of GCCF final settlement payment option program, \textit{infra} at notes 192-98.

\textsuperscript{188} But see Snyder, \textit{BP Spill Claims From 50 States Confront Administrator Feinberg}, \textit{supra} n. 39 (indicating that as early as August 16, 2010, Feinberg had set aside a “modest amount”, which he did not disclose, to compensate Gulf State realtors, whose trade association had met with Feinberg the week before. “The realtors have “suffered a great deal” in lost sales, rent, and commissions, [Feinberg] said.”).

\textsuperscript{189} Urbina, \textit{BP Settlements Likely to Shield Top Defendants}, \textit{supra} n. 109 (Feinberg to determine on a case-by-case basis what qualifies as beach-front property and how payments would be adjusted on a sliding scale based in part on geographic proximity to spill). The emergency protocols provided no information on how awards would be computed. See GCCF Protocol for Emergency Advance Payment, \textit{supra} n. 62.

\textsuperscript{190} Brian Skoloff, \textit{91,000 Gulf Oil Spill Claims, Just 1 Final Payment}, http://news.yahoo.com/s/ap/20110113/ap_on_bi_ge/us_gulf_oil_spill_claims (last accessed on February 1, 2011).}
484,000 claims filed were denied because of ineligibility of lack of documentation. These claimants received nothing from the GCCF. 191

Feinberg’s final payment program includes three options. 192 Thus, claimants may elect to receive a quick, one-time flat cash payment of $5,000 for individuals and $25,000 for businesses. 193 As of February 1, 2011, some 80,000 claimants filed and were paid pursuant to this option. 194 Claimants receiving the flat payments gave up their rights to receive any additional money and also released their rights to sue BP or any other responsible party. 195

Those claimants who do not wish to elect the flat payment option may pursue individualized evaluation of their claims. 196 Based on as yet unspecified procedures and valuation methods, claimants who receive final settlement offers also would release their rights to sue BP and other responsible parties. 197 Finally, residents and business owners who are unwilling to accept the flat payment offer, but who also are unready to make a final settlement claim, may file for interim quarterly payments through August 2013, provided they show proof of continued business losses. 198

191 Id. See also John Schwartz, Administrator of BP Fund Offers Bonuses to Spill Victims Who Bypass Suits, N.Y. Times (Dec. 12, 2010) (reporting that more than 200,000 claims denied because of poor or no documentation), available at http://www.nytimes.com/2010/12/13/us/I3fund.html?

194 Brian Skoloff, 91,000 Gulf Oil Spill Claims, Just 1 Final Payment, http://news.yahoo.com/s/ap/20110131/ap_on_bi_ge/us_gulf_oil_spill_claims (last accessed on February 1, 2011).

Thus, notwithstanding Feinberg’s endorsement of flat, standardized payments to claimants after his experience with the WTC Fund, Feinberg chiefly has pursued a course of individualized compensation for the GCCF settlement of claims.

Moreover, in contrast to the WTC Fund, the valuation methods used to determine the emergency or final settlement awards for GCCF claimants are shrouded in mystery as well as uncertainty. No compensation grid comparable to the WTC Fund has been published to guide GCCF claimants in assessment of their potential recovery for different types of claims. No valuation standards have been published to the public. There is no publicly available information concerning the identity, experience, or training of staff claims administrators, or the methodology by which staff adjusters evaluated emergency payments and will determine final settlement offers. There has been some indication that entities or groups with special access either to BP or Feinberg are able to cut special deals for themselves as a consequence of this special access.

199 Kaufman, *Feinberg Vows Quick Response on Gulf Oil Spill Claims*, supra n. 7 (Feinberg promises Louisiana town hall meeting to quickly reveal basis for his award calculations); see *GCCF Protocol for Emergency Advance Payment*, supra n. 62 (no valuation method indicated). The GCCF’s protocol for final settlement payments does include sample calculation for individuals and businesses. See Gulf Coast Claims Facility Announcement of Payment Options, Eligibility and Substantiation Criteria, and Final Payment Methodology (February 2, 2011), available at http://www.gulfocastclaims-facility.com/_Methodology. Feb.2. final DRAFT.pdf., with Attachment A (Sample Calculation for Individual Claimant), and Attachment B (Sample Calculation for a Business Claimant).

200 Feinberg has made a number of ad hoc pronouncements, on-the-fly. See e.g., Feinberg *Says BP Fund Will Be Generous, Better Than Lawsuits*, Bloomberg News (July 15, 2010), available at http://businessweek.com/news/2010-07-15/feinberg-says-bp-fund-will-be-generous (Feinberg indicates victims could be compensated for lost health insurance or tourism revenue, not solely for direct damage from spilled oil); see also Kaufman, *Feinberg Vows Quick Response on Gulf Oil Spill Claims*, id.; *GCCF Protocol for Emergency Advance Payment*, supra n. 7 (no computation information indicated).

201 But see *GCCF Protocol for Emergency Advance Payment*, supra n. 62 (indicating claims to be evaluated by an unspecified claims evaluator).

202 See e.g., Snyder, *BP Spill Claims From 50 States Confront Administrator Feinberg*, supra n. 39 (indicating that as early as August 16, 2010, Feinberg had set aside a “modest amount,” which he did not disclose, to compensate Gulf State realtors, whose trade association had met with Feinberg the week before. “The realtors have “suffered a great deal” in lost sales, rent, and commissions, [Feinberg] said.”); see also (add cite to reported $10 million final payment made to BP business partner); Urbina, *BP Settlements Likely to Shield Top Defendants*, supra n. 109 (reporting on political deal struck with governors of Alabama and Mississippi, setting aside approximately $60 million from the fund in a special pool to compensate negatively affected real estate brokers in the gulf region who were otherwise ineligible for compensation from the fund. This money was not to be distributed by Feinberg, but rather by the National Association of realtors in Washington D.C. or local chapters in Alabama, Florida, Louisiana, Mississippi and Texas. In addition, the national association was to set eligibility requirements—not Feinberg—although Feinberg would view those criteria).
In addition, as indicated above, Feinberg has become aware of the problem of inconsistent awards, and has now embarked on program of grouping claimants by similar business enterprises. However, there is no publicly available information concerning how award determination based on these clusters are to be implemented, or the standards by which staff are to be determine final settlement awards in the context of these groupings.

On February 1, 2011 media reported that the GCCF had issued exactly one final settlement payment out of thousands of claimants, for a $10 million award to a BP business partner. BP acknowledged that it had intervened and lobbied for the settlement on behalf of the unidentified company, and ordered the facility to make the payment. Feinberg reported that BP had struck outside deal with the business and told the GCCF to make the payment. In addition, Feinberg stated that the GCCF had never reviewed the business’s claim for merit.

The $10 million payment out of GCCF funds to a BP business partner as the result of a private settlement negotiation with BP, without the review and participation of the GCCF, precipitated further questions about the GCCF’s lack of transparency and independence from BP, as well as of claims being short-changed and paid too slowly, or not at all.

3. Collateral Sources

The application of the “collateral source” rule to compensation awards played a role in the administration of both the WTC Fund and the GCCF. The Act authorizing creation of the WTC Victim Compensation Fund provided for the reduction of awards by collateral source benefits such as insurance, pension funds, and other government payments. Not surprisingly, Feinberg drew on his experience with the WTC Fund to guide his decisions about the applicability of the collateral source rule in administering the GCCF.

The collateral source rule is a doctrine most commonly used in tort law. Pursuant to this rule, when a person successfully prevails on a tort

claim in court, the collateral source rule mandates that any other compensation from other sources should *not* be deducted to diminish the claimant's award. Thus, insurance proceeds and similar benefits that a claimant may receive for the same injury are not subtracted from a prevailing party's award.210

The application of the collateral source rule played a highly controversial and much-publicized role in the administration of the WTC Fund.211 At the outset, Feinberg determined that any monies or benefits that WTC claimants received from collateral sources would be deducted from an award that was determined by the WTC Fund staff.212 The fact that *any* collateral source funds would be deducted from WTC Fund awards engendered the ire of claimants, who raised an array of fairness arguments concerning application of this rule.213 For example, claimants protested that the deduction of collateral source benefits penalized those claimants who had worked hard throughout their lives and had accumulated pensions,214 or taken prudent steps to protect their family members by purchasing insurance.215

Over the course of administering the WTC Fund, Feinberg waffled on the application of the collateral source rule.216 Similar to his decision-making pattern with regard to other Fund criteria, Feinberg gradually softened his initial absolutist rule.217 Under increasing protest and pressure, Feinberg repeatedly modified his stance on what "collateral sources" would be deducted from Fund awards, and what collateral sources would not.218

217 Feinberg *et al.*, *FINAL REPORT OF THE SPECIAL MASTER* at 45–52; Alexander, *Procedural Design*, supra n. 5 at 676 ("Though the statutory language appears quite clear, its application has been substantially narrowed in practice.").

218 Feinberg *et al.*, *FINAL REPORT OF THE SPECIAL MASTER* at 45–52.
In the end, Feinberg determined that almost all collateral sources of benefits would be deducted from WTC Fund awards.\textsuperscript{219} On the other hand, to appease his critics, Feinberg also determined that collateral source benefits would not be used to reduce any claimant’s award below $250,000.\textsuperscript{220} In addition, Feinberg ultimately determined that charitable donations that claimants received from various organizations also would not be deducted from WTC awards.\textsuperscript{221}

There are two salient points about Feinberg’s resolution of the collateral source rule in the context of the WTC Fund. First, the approach used in administering the WTC Fund basically rejected the traditional tort rule: if WTC claimants had pursued tort claims in court, they would not have been subject to reduction of their awards by any insurance, pension, or similar benefits. Second, Feinberg’s decisions with regard to the collateral source rule changed over time and typically in response to heated public pressure. Thus, Feinberg engaged in his pattern of on-the-fly rule modification based on claimant pressure, rather than resolving this issue through deliberative rulemaking. As a consequence, at least one critic has suggested that there is no principled rationale for the distinctions that the Special Master accorded to different collateral source benefits.\textsuperscript{222}

With his installment as the GCCF administrator, Feinberg was entirely familiar with the issue of the collateral source rule in the context of fund-approaches to victim compensation. Taking a page from the WTC Fund playbook, Feinberg determined that GCCF awards also would be reduced by any monies or benefits that GCCF claimants received from other sources.\textsuperscript{223} Again, the imposition of collateral source reduction of awards stirred controversy,\textsuperscript{224} in no small part because BP lobbied Feinberg to include a collateral source deduction.\textsuperscript{225}

\textsuperscript{224} Kaufman, \textit{Feinberg Vows Quick Response on Gulf Oil Spill Claims}, id. (citing irate local resident in regard to the offset: “You have no clue as to what we did, and then you are going to act like we should just be grateful for what we got. . . Are you kidding me?”); Neil King Jr., \textit{Feinberg Criticized}, supra n. 107 (fishermen angry about decision to deduct amounts paid by BP in clean-up to boat owners and others who aided in clean-up efforts); Urbiria, \textit{BP Settlements Likely to Shield Top Defendants}, supra n. 109 (reporting on emergency payment protocols to deduct collateral source payments, including any earnings or profits people received from another job or other source of

- 59 -
One of the most controversial applications of the collateral source rule in administration of the GCCF was the announcement that claimants' awards would be reduced by any monies that they earned while participating in the Gulf clean-up. 226 Hundreds of fisherman and boat owners had been hired by BP to assist in the oil spill clean-up, and were paid for these efforts. These claimants protested that the oil spill had prevented them from engaging in their usual employment, and it was unfair to deduct clean-up earnings from their fund awards, because this would be tantamount to working for BP for free in the clean-up efforts. 227

In response to these criticisms, and similar to the pattern he followed in supervising the WTC Fund, Feinberg modified his position on the collateral source issue. In regard to the clean-up efforts, Feinberg backtracked and announced that any monies earned by local participating in the Gulf clean-up would not be deducted from GCCF awards. 228

In the absence of publicly available information, it is difficult to ascertain what other collateral sources have been and will be deducted from GCCF awards. The absence of advance notice places claimants in an uncertain universe. Exacerbating this problem, claimants lacking legal representation may be unaware that their awards will be reduced by collateral sources, how those amounts will be determined, and that if they pursued relief in court their awards might not be reduced by collateral sources.

The modification of jury awards by collateral source funds has long been a staple of tort reform advocates, typically corporate defendants. 229

(Sept. 20, 2010), available at http://www.chron.com/disp/story.mpl/business/7210041.html. (Feinberg announces he will waive requirement that wages earned by spill cleanup workers be subtracted from their claims of lost revenue).

229 See Priest, The Problematic Structure, supra n. 15 at 532 n. 15.
Fund resolution of corporate legal liabilities, therefore, embraces this dimension of tort reform, and favors defendants. As the WTC Fund and now the GCCF Fund demonstrate, in order to receive a quick resolution of the claims, participants must agree to reduce their awards by collateral source funds. Fund resolution of mass tort claims, then, embodies an end-run around the collateral source rule that applies in judicially adjudicated tort litigation.

Against this backdrop, a problematic issue with the application of the collateral source rule in the context of the GCCF—and unlike the WTC Fund experience—is that the responsible party BP required that collateral sources be deducted from awards. Although the GCCF website declares that the GCCF is a neutral claims facility and Feinberg has repeatedly stated that he is functioning as an independent administrator, the reduction of awards by collateral source funds is the consequence of BP’s insistence. The fact that a “responsible party” has a role in determining a significant criterion in calculating awards is troubling.

D. Appointment of the Special Master/Administrator

Ken Feinberg has assumed the central role in implementing both the WTC Fund as well as the GCCF. However, these two fund experiences present contrasting examples with regard to the designation of fund manager. In addition, the designation of the fund manager in both situations has implicated important issues regarding authorization of the manager, scope of duties, accountability, and professional ethics.

In comparing the two, then, the GCCF experience suggests a significant, relatively unguided expansion of the role of the fund manager, raising troubling questions about professional ethics and ultimately fund legitimacy. As will be discussed, until recently the appointment of a “special master” was based on legal rules and principles. However, with the advent of the WTC Fund and the GCCF, the concept of a special master has been transformed from a court-appointed surrogate, circumscribed by delegated duties, into an all-powerful, quasi-lawless, free-wheeling demi-god.

1. Appointment Authorization

The federal statute creating the WTC Victims’ Compensation Fund authorized the appointment of a special master. The concept of a

---

230 See discussion of BP’s role in the development of the collateral source rule in the context of the GCCF, supra at Part II.C.3.

231 See GCCF Frequently Asked Questions #1 (describing the GCCF as a neutral facility and Feinberg as a neutral administrator), available at http://gulfcoastclaims-facility.com/fac

232 See discussion of Feinberg as an independent administrator, infra at 288.

234 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 3; ATSA at § 404(a), 115
“special master” is well-known in federal courts and Federal Rule of Civil Procedure 53 authorizes federal judges to appoint special masters to assist the court in the resolution of certain types of cases. Historically, federal judges used Rule 53 sparingly to appoint special masters to assist in complex commercial litigation, where the special master might assist the court in conducting an independent audit of financial records.

In the past thirty years, some federal judges have considerably expanded the use of special masters, particularly in the resolution of mass tort cases. In the mass tort litigation arena, special masters have been appointed to prepare trial plans, organize and evaluate the universe of potential claims, create compensation award grids, and to negotiate and implement settlements, among many functions. As is widely reported, Ken Feinberg began his career as a professional special master assisting Judge Jack Weinstein in the Agent Orange litigation.

Ken Feinberg’s appointment as the special master to oversee the WTC Fund was not made by a federal judge pursuant to the authority of Rule 53. Instead, Attorney General John Ashcroft appointed Feinberg directly pursuant to the federal statute that created the Fund. From the outset, then, as an Executive branch appointee, Feinberg’s appointment as “special master” was outside the ordinary judicial understanding of a special master.

Alexander, Procedural Design, supra n. 5 at 663.

Alexander, Procedural Design, supra n. 5 at 663.

See Peter H. Schuck, AGENT ORANGE ON TRIAL: MASS TOXIC DISASTERS IN THE COURTS (1986) at 144–45.

Commenting on this unusual arrangement, Professor Alexander observes:

There is no point to calling an administrator within the Justice department a special...
Feinberg volunteered for the job and pursued appointment as the special master through Washington D.C. contacts he acquired while working on Capitol Hill. General Ashcroft appointed Feinberg based on his experience as a special master in the Agent Orange settlement, his willingness to administer the WTC Fund without pay, and his familiarity with various Congressmen and staffers. The appointment did not require Congressional approval. As a consequence of the unusual legal basis for his appointment, Feinberg in his role of "special master" technically was not answerable to any branch of government.

Whereas Feinberg’s appointment to oversee the WTC Fund had an ascertainable legal basis in a federal statute, his appointment to administer the GCCF did not. In his supervision of the GCCF, Feinberg is not serving as a "special master" although that label sometimes is misapplied to his efforts. Rather, Feinberg is the designated fund "administrator." His appointment as the fund administrator seems to be the result of closed door negotiations between BP and Feinberg, subsequently endorsed by the President. Congress had no role in the creation of the GCCF or Feinberg’s appointment as its administrator.

Public records indicate that as early as May 2010, BP summoned Feinberg to Houston for private discussions concerning his possible appointment to take over responsibility for overseeing resolutions of
Gulf claims against BP.\textsuperscript{249} This arrangement seemed in place by the time that BP met with President Obama in June 2010, when BP agreed to contributing $20 billion to a compensation fund.\textsuperscript{250} Shortly thereafter, the White House quickly agreed to and announced Feinberg as the fund’s administrator.\textsuperscript{251}

Unlike his appointment to the WTC Fund, there is no legal basis for Feinberg’s appointment as the GCCF administrator. The appointment was not made by a federal judge pursuant to Rule 53, nor was the appointment made pursuant to federal statute, although Feinberg subsequently would claim authority remotely from the OPA.\textsuperscript{252} Feinberg’s appointment as administrator was the consequence of a private negotiation and deal with BP, the designated responsible party for the Gulf disaster. There is no public record whether any other actor was considered to undertake the role of fund administrator. In the heat of exponentially expanding public outrage, the President quickly rubber-stamped BP’s preference for Feinberg.

2. Scope of Duties

A special master who is appointed by a federal judge is subject to duties and responsibilities set forth in Rule 53.\textsuperscript{253} Typically, a judge who appoints a special master does so by court order which sets forth a specific task the master is to accomplish, a time period in which to complete the special master duties, as well as the scope of the master’s authority.

In many instances where a judge contemplates the appointment of a special master, the judge will consult with attorneys involved in the litigation for suggestions regarding possible candidates for the appointment, as well as assistance in delimiting the scope of special master’s duties. Counsel may object to the appointment of a special

\textsuperscript{249} Id.

\textsuperscript{250} See Press Release, BP Establishes $20 Billion Claims Fund for Deepwater Horizon Spill and Outlines Dividend Decisions (June 16, 2010), available at http://www.bp.com/genericarticle.do?categoryID=2012968&contentld=7062966. The BP Press release announced that Ken Feinberg would administer the Independent Claims Facility; that funds would be available to satisfy “legitimate claims,” that the ICF would adjudicate all OPA claims and tort claims, excluding federal and state claims. BP also indicated that the fund did not cap its liability, but that money left over in the fund once all legitimate claims were resolved would revert to BP; Strassel, Mr. Fairness, supra n. 3.

\textsuperscript{251} White House Blog, A New Process and a New Escrow Account for All Oil Spill Claims from BP (June 17, 2010), available at http://www.whitehouse.gov/blog/2010/06/17/ a-new-process-and-a-new-escrow-account. The White House blog indicated that the facility would develop standards for recoverable claims that would be published, and that a panel of three judges would be available to hear appeals of the administrator’s decisions. See also Strassel, Mr. Fairness, supra n. 3.

\textsuperscript{253} Fed. R. Civ. P. 53.
master, the definition of the special master's assigned project, or the scope of the master's authority.\textsuperscript{254}

As indicated above, Feinberg's appointment as the special master to oversee the WTC Fund was not made by a federal judge pursuant to Rule 53. No judicial order specified the tasks Feinberg was to perform, described the scope of his authority, or limited his discretion. Consequently, Feinberg rapidly assumed expansive supervision, control, and discretion over all matters involved in administering the WTC Fund. As has been discussed above, after an initial round of formal notice-and-comment rulemaking, Feinberg increasingly assumed vast powers to modify and change rules and standards governing administration of the WTC Fund.

Similar to his experience with the WTC Fund, Feinberg's management of the GCCF facility has not been subject to a Rule 53 court order, or any other judicially-created mandate. Basically, Feinberg's supervision and control of the GCCF has been a relatively unguided and unbounded exercise of power by a single administrator.\textsuperscript{255}

3. Accountability

Special masters who are judicially-appointed pursuant to Rule 53 are accountable to the court that appointed them to undertake some task. In essence, special masters are not free agents. Rule 53 requires that the special master, upon completion of the master's work, submit a report to the court.\textsuperscript{256} The judge may then utilize the special master's work product in any fashion the court deems appropriate. Parties involved in the litigation may submit comments or challenges to the special master's findings and conclusions. The court may accept, modify, or reject a special master's findings, and adopt the master's report in whole or part.\textsuperscript{257}

Feinberg was not appointed special master pursuant to Rule 53 and therefore, in administering the WTC Fund, he technically was not subject to the requirements of Rule 53 nor was Feinberg answerable to a federal judge for whom he was working. Because of his unusual status as a Congressionally-authorized, executively-appointed Special Master, Feinberg has been criticized for being uniquely unaccountable in the exercise of his office.\textsuperscript{258}

\textsuperscript{254} See DeGraw, Rule 53, supra n. 238 at 811.

\textsuperscript{255} Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 20: "Despite the independence granted by the expansion of the court-appointed special master's role, special masters are always answerable to the judges who appoint them for a particular case and are further supervised by the rigors of the adversarial process. No such checks exist over the Fund's Special Master, making Feinberg a rare, and tenuous, judicial creature."

\textsuperscript{256} Fed. R. Civ. P. 53(f).

\textsuperscript{257} See Federal Judicial Center, MANUAL FOR COMPLEX LITIGATION FOURTH at § 11.52 (2004).

\textsuperscript{258} See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 211 ("It
Nonetheless, in implementing and administering the Fund, Feinberg was loosely accountable to various constituencies. Thus, Feinberg was remotely was answerable to Attorney General Ashcroft.\textsuperscript{259} In addition, because Congress had authorized the WTC Fund, Feinberg was accountable to various Congressional committees, the WTC Fund claimants, and the public. After the WTC Fund was closed, Feinberg issued a report on his work to Congress.\textsuperscript{260}

During his tenure as special master, Feinberg also developed an interesting synergy with federal Judge Alvin Hellerstein, who was assigned the cases of claimants who had elected not to receive compensation through the WTC fund.\textsuperscript{261} Feinberg apparently initiated numerous conference calls with Judge Hellerstein, in order to coordinate their efforts and to impart information about the relative risks of seeking compensation either through the Fund or litigation.\textsuperscript{262} Judge Hellerstein, acting in concert with Feinberg, required that individuals pursuing judicial relief in the tort system to have first weighed and assessed the

\textit{is in this particular area where the Fund’s most serious procedural shortcoming is apparent. Were we to grade the Fund’s accountability on the upstream end, we would give it a “C” . . . But with major gaps to fill, some of the most significant rule-making was left to an appointed Special Master with no direct accountability to the electorate. . . It is on the downstream end, however, where accountability all but disappeared.”}; Diller, \textit{Tort and Social Welfare Principles}, supra n. 15 at 726 (Fund vested too much discretion in the Special Master with little means of accountability and oversight); Schneider, \textit{Grief, Procedure, and Justice}, supra n. 19 at 477 (vesting so much discretion in one decision-maker increases perceptions of unfairness); Tyler and Thorisdottir, \textit{A Psychological Perspective}, supra n. 15 at 384 (large amount of discretionary authority of Special Master raised suspicions that biases and person preferences would shape allocation decisions).

Highly critical of Feinberg’s role, Professor Diller has concluded:

\begin{quote}
Feinberg’s conduct highlights the central weakness of the Fund as an administrative mechanism—its operation rests on the personal choices of a single individual, with little means of accountability and oversight. As Feinberg has construed his grant of authority, there are few governing legal standards, no real requirement that like claims be treated alike, no obligation to provide reasoned explanations, no limits on the amount that may be spent, and no means of judicial review.
\end{quote}

Diller, \textit{id.} at 767.

\textsuperscript{262} Steven Brill, \textit{AFTER: HOW AMERICAN CONFRONTED THE SEPTEMBER 12 ERA} (2003) at 537–38 (suggesting that Feinberg tried to posture this as Judge Hellerstein’s idea, “but plaintiffs lawyers immediately saw his [Feinberg’s] fingerprints on it, and they were outraged. How could he and a judge interfere this way in an attorney-client relationship?”); \textit{see also} Berkowitz, \textit{The Problematic Role of the Special Master, supra} n. 18 at 27–28 (describing the relationship of Feinberg and Judge Hellerstein in urging victims to take their relief from the Fund).
alternative remedy of receiving compensation from the Fund. In this fashion, Judge Hellerstein, in concert with Feinberg, pressured claimants not to pursue tort litigation, but instead to take an award from the WTC Fund.

In addition, as will be discussed below, Judge Hellerstein otherwise did not oversee or review Special Master Feinberg’s various decisions relating to implementation and administration of the WTC Fund. Although some claimants challenged to WTC Fund criteria in court, Judge Hellerstein ruled that while he could review the legality of those criteria, he would not review any individual challenges in the application of those standards and rules. And, Judge Hellerstein upheld the legality of Feinberg’s standards for administration of the Fund, including the decision that Feinberg had not impermissibility created a cap on awards for high-end earners.

In contrast, in implementing and administering the GCCF, Feinberg appears to be accountable to no one, except possibly BP. Because Feinberg is not functioning as a court-appointed special master under Rule 53, he is not accountable to any federal judge or the judicial system. Feinberg’s independence from BP has been repeatedly challenged.

263 See Milo Geyelin, Judge Wants Victims of September 11 Who Sue to Know the Risks of Action, Wall St. J. at B2 (April 11, 2002).

268 Colaio, id.

269 Feinberg’s relationship with BP has raised numerous ethical issues; see discussion infra at note 276. As early as June 20th, Feinberg’s independence from BP was questioned. See Charles E. Lavis, Interview with Ken Feinberg, The Independent Administrator of the BP Oil Spill Victim Compensation Fund (June 20, 2010), available at http://www.bpoilspilllawblog.com/2010/06/ken-feinbergs-interview-on-mee.html?utm (noting that Feinberg was being paid by BP); see also Campbell Robertson, As Claims for Spill Losses Shift to Administrator, Queries Follows, N.Y. Times (Aug. 23, 2010) (Gulf Coast resident querying Feinberg: “If you’re not with BP and you’re not with the government, who are you with?”); Urbina, BP Settlements Likely to Shield Top Defendants, supra n. 109 (reporting BP’s successful lobbying effort with Feinberg to require deduction of collateral benefits from GCFF awards).

270 See discussion of Feinberg’s independence from BP, at note 116. See Kaufman, Feinberg Vows Quick Response on Gulf Oil Spill Claims, supra n. 7 (reporting on town hall meeting in Houma, Louisiana: “I feel that you have a serious conflict of interest,” one audience member charged. “The Bible states one man should not serve two
Similarly, because his work as fund administrator is not derived from specific Congressional authorization, Feinberg is not accountable to any legislative oversight, although he voluntarily appeared before House subcommittees shortly after his designation as the GCCF administrator. Finally, because the Attorney General did not appoint Feinberg—as the Attorney General did for the WTC Fund—Feinberg is not subject to Executive branch oversight, either.

In the context of the GCCF, Feinberg is operating basically as an entirely free agent, accountable ultimately to no one. He has complete authority to make rules and standards, to change those rules and standards, to issue awards, and to provide or deny whatever procedures he deems appropriate. As will be discussed, claimants have limited opportunities to appeal decisions of the fund administrator. Thus, Feinberg is the original and ultimate arbiter of both substantive and procedural due process in administering the GCCF.

It remains to be seen what relationship will develop between Feinberg’s administration of the GCCF and the Gulf Coast Oil Spill MDL created in the Eastern District of Louisiana under the management of federal Judge Carl J. Barbier. Plaintiff’s attorneys filed a motion in that MDL proceeding to enjoin Feinberg from encouraging claimants to seek their compensation solely from the Fund, which Judge Barbier granted in February 2011. In the context of the WTC Fund, masters.”); Robertson, As Claims for Spill Losses Shift, id.

271 See also Jim Snyder, Feinberg to Meet U.S. Senator as Complaints Mount Over BP Claims, Bloomberg Businessweek (Sept. 28, 2010) (reporting that Feinberg had testified before four Congressional panels on July 22, 2010; Feinberg summoned to meeting with Senator Tom Carper to answer criticisms from Gulf Coast residents about claims process); Jim Snyder, Carper Says Gulf Claims System Needs Work, Vouches for Feinberg, Bloomberg News (Sept. 29, 2010) (Senate Government Affairs Subcommittee monitoring claims process); Carper Statement on Meeting With Kenneth Feinberg (Sept. 29, 2010), available at http://carper.senate.gov/press/record.cfm?id=328035.

272 See discussion on appellate review of GCCF award decisions, infra at notes 324-28. The protocol for emergency payment provided no means for appeal, at all. See GCCF Protocol for Emergency Advance Payment, supra n. 62.

273 But See GCCF Protocol for Emergency Advance Payment, supra n. 62 (providing for the GCCF to institute periodic audits to evaluate the accuracy of submissions and payments, but seemingly not to monitor the administration or determination of awards).

Judge Hellerstein appeared to attempt to coordinate his judicial efforts with Feinberg. At this writing, it is unclear what approach the Louisiana federal court will adopt with regard to coordination, interference, or non-interference with Feinberg’s parallel efforts.

4. Professional Ethics

Feinberg’s continued role as the GCCF administrator, over time, has raised a myriad of controversial and unresolved issues relating to professional ethics. Although in administering the WTC Fund Feinberg made a number of contentious decisions, and angered various constituencies, there were few reported ethical challenges to his administration of that Fund. That has not been true in Feinberg’s administration of the GCCF.

The most trenchant ethical challenge asserted against Feinberg’s management of the GCCF centers on Feinberg’s perceived conflict-of-interest. In addition, others have questioned BP’s continued intervention and interference with various aspects of the GCCF’s operations. Critics repeatedly have pointed out that BP selected Feinberg to administer the Fund, BP is paying Feinberg and his law firm, and BP has influenced a number of decisions relating to the Fund’s implementation and administration, such as the deduction of collateral source funds and releases for final claims awards.

But see Diller, *Tort and Social Welfare Principles*, supra n. 15 at 759–61 (raising ethical issues about Feinberg’s judgment).

See Kaufman, *Feinberg Vows Quick Response on Gulf Oil Spill Claims*, supra n. 15 (town hall meeting participants challenge Feinberg’s independence and note conflict-of-interest).

Moreover, Feinberg was appointed as administrator after private negotiations with BP, well in advance of creation of the GCCF, and seemingly without the consultation of any other affected parties. Feinberg has been reported traveling around the Gulf coast states in BP private jets and meeting with BP executives. In addition, for several months Feinberg resisted disclosure of BP’s compensation to him, repeatedly telling the press that this information would be forthcoming. To date, Feinberg has not disclosed his BP compensation (other than information relating to an alleged $850,000 monthly payment to Feinberg’s law firm).

Further enflaming and exacerbating the conflict-of-interest debate, on February 1, 2011 the media reported that the GCCF had made its first final settlement award to a BP business partner in the amount of $10 million. The payment of this final settlement moved BP’s business partner to the head of the queue of approximately 91,000 other individuals and businesses that have filed for final settlement.

---

BP acknowledged that this payment was privately negotiated between BP and its partner and that BP had ordered the GCCF to make the payment. In response to questions about this arrangement, Feinberg indicated that BP had struck an outside deal, had told the fund to make the payment, and that the claims facility had never made its own independent review of the merits of the claim. These events clearly belie repeated assertions from both BP and Feinberg that BP has been and is acting independently from the GCCF.

In response to his critics, Feinberg repeatedly has avowed that he functions as an impartial administrator, and the GCCF website declares that the facility is a “neutral” fund and that Feinberg is a neutral fund administrator. He has repeatedly indicated that he was promised total independence from both BP and the White House.

As questions about Feinberg’s conflict-of-interest and other ethical issues have continued unabated, Feinberg retained Professor Stephen Gillers of New York University Law School to render an expert opinion regarding various ethical challenges. In late December 2010, Professor Gillers issued an expert report concluding that Feinberg was not violating any professional responsibility standards. Professor Gillers was paid for this work out of BP funds, at the rate of $950.00 an hour, raising further questions about the independence of Feinberg, Gillers, and BP.

The issues relating to Feinberg’s independence and neutrality in implementing the GCCF are intricately interwoven with questions concerning the capacity in which Feinberg and his law firm are serving.
Professor Giller’s ethical analysis is grounded in his conclusion that Feinberg is not functioning as an attorney, within the bounds of an ordinary attorney-client relationship. Simply, Feinberg and his law firm, and the GCCF facility it is managing, are not acting as a “lawyer for BP,” and consequently BP is not Feinberg’s client. By defining the threshold capacity question in this fashion, Professor Gillers effectively has insulated Feinberg from all professional standards, rules, and accountability.

As indicated above, the plaintiffs’ bar has sought, in the MDL 2179 proceedings, to enjoin Feinberg from various actions in administering the GCCF, particularly seeking judicial supervision over communications by Feinberg with potential civil litigants. Professor Geoffrey Hazard has submitted an expert Declaration in support of this request, opining that Feinberg’s law firm either is acting as a lawyer for BP, or if not, then as an agent for BP. In contrast to Professor Giller’s conclusions, Professor Hazard suggests the GCCF is not an entirely independent facility, because its substantial operating expenses are being paid by BP. Professor Hazard points out that the attorneys hired to assist in the GCCF claims process are not working pro bono (as they did in administering the WTC Fund), but are being paid by BP. As such, Professor Hazard suggests that they are ethically bound to inform any claimant that they may assist in the GCCF process, of that compensation arrangement. In addition, Professor Hazard suggests that the GCCF is not functioning as a mediation enterprise, because it was established unilaterally by BP and not with the agreement of opposing claimants.

In contrast to Professor Giller’s expert opinion, Professor Hazard further concludes that Feinberg is an attorney representing the GCCF,

294 Gillers, Letter Report at 4 (“You are not in an attorney-client relationship with BP. You are an independent administrator and owe none of the attributes of the attorney-client relationship (e.g., loyalty, confidentiality) to BP.

295 Id. (“By “independent” I mean (and I think the context is clear) that you are independent of BP. You are not subject to its direction or control.”). See Jim Snyder and Carol Massar, Feinberg Says Half of $20 Billion BP Fund Should Cover Claims, Bloomberg News (Jan. 1, 2011) (Giller’s conclusions on Feinberg’s independence).

297 Declaration of Geoffrey C. Hazard Jr., In re Oil Spill by the Oil Rig “Deepwater Horizon” in the Gulf of Mexico, on April 20, 2010, MDL 2179 (E.D. La.) (Jan. 15, 2011).

and that his actions and statements may properly be evaluated under the Louisiana Rules of Professional Conduct and the counterpart professional rules of other jurisdictions. Subjected to this scrutiny, Professor Hazard suggests that many of Feinberg’s actions and statements might be considered professionally improper under the codes of professional responsibility.

On February 2, 2011, Judge Barbier issued his opinion enjoining Feinberg. Judge Barbier’s Order required that the Defendant BP, through its agents Ken Feinberg, Feinberg Rozen LLP, and the Gulf Coast Claims Facility, and any of their representatives, in any of their oral or written communications with claimants, shall:

(1) Refrain from contacting directly any claimant that they know or reasonably should know is represented by counsel, whether or not said claimant has filed a lawsuit or formal claim; (2) Refrain from referring to the GCCF, Ken Feinberg, or Feinberg Rozen, LLP (or their representatives), as “neutral” or completely “independent” from BP. It should be clearly disclosed in all communications, whether written or oral, that said parties are acting for and on behalf of BP in fulfilling its statutory obligations as the “responsible party” under the Oil Pollution Act of 1990. (3) Begin any communication with a putative class member with the statement that the individual has a right to consult with an attorney of his/her own choosing prior to accepting any settlement or signing a release of legal rights. (4) Refrain from giving or purporting to give legal advice to unrepresented claimants, including advising that claimants should not hire a lawyer. (5) Fully disclose to claimants their options under OPA if they do not accept a final payment, including filing a claim in the pending MDL 2179 litigation. (6) Advise claimants that the “pro bono” attorneys and “community representatives” retained to assist GCCF claimants are being compensated directly or indirectly by BP.

In addition to the conflicts-of-interest issue, Feinberg also has come under heated attack for urging potential Gulf Coast claimants to seek remediation through the GCCF, rather than the judicial system. In this

regard, Feinberg has repeated the course he followed in administering the WTC Fund. Then, Feinberg created controversy by his public admonitions that claimants take their relief exclusively through his fund, famously declaring at one point that the WTC Fund "was the only game in town." 307 Although WTC claimants criticized Feinberg for his often blunt demeanor in urging them to act quickly, Feinberg did not raise many objections from the practicing bar. In the context of the GCCF, however, Feinberg has engendered the considerable ire of the plaintiffs' bar, which attorneys have successfully enjoined Feinberg from his repeated public urgings that claimants take their exclusive relief through the GCCF. 308

In contrast to Professor Giller's over-arching conclusion, Feinberg's critics believe that he is an attorney subject to professional responsibility standards and that he is accountable as an attorney for his actions. 309 Hence, Feinberg's critics have contended that Feinberg's repeated statements urging Gulf Coast claimants to take their exclusive remedies in the GCCF constitute providing legal advice, notwithstanding Feinberg's protestations to the contrary. 310 In this regard some commentators have argued that Feinberg is not authorized to practice in the Gulf States, and as a consequence Feinberg is engaged in the unauthorized practice of law. 311 In this vein, some have questioned what code of professional conduct governs Feinberg's actions in administering the GCCF. 312 In his Declaration in support of an injunction Professor Hazard has opined that under the Louisiana Code of Professional Responsibility, many of Feinberg's public pronouncements convey inaccurate and misleading statements, constituting further breaches of professional ethics.

The swirling professional responsibility issues relating to Feinberg's capacity and ethical duties are yet unresolved. Nonetheless, Feinberg's very legitimate policy issues about releasing BP from liability before all damage from the spill is known).

311 See Pacenti, Plaintiffs' Attorneys Knock BP Fund Administrator, id.
312 Id.
unusual appointment status and his controversial administration of the GCCF have exposed novel ethical fault-lines in the administration of such funds. If Feinberg is deemed as acting as an attorney, then he is subject to as-yet-determined rules of professional responsibility. However, if Feinberg is not acting in the capacity of an attorney, then legitimate questions exist regarding the capacity in which he functions, and what standards constrain his actions. It is worth noting that attorneys, mediators, arbitrators, and even insurers are all subject to professional codes of conduct. Feinberg’s administration of the GCCF raises problematic questions whether he is in any way bound by any professional standards.

Finally, it is worth noting that, as a matter of common sense, Feinberg cannot be the final judge and arbiter of his own neutrality, impartiality, and independence. His repeated self-serving statements to this effect should be accorded little weight. It might be added, moreover, that Feinberg’s often tone-deaf responses to ethical challenges in the context of his administration of the GCCF have not served him well in addressing these serious issues.

E. Reviewability of the Special Master’s/Administrators Decisions

An enterprise’s legitimacy may be measured, in part, by the degree to which its decisions are subject to independent appeal and review. Both the WTC Fund and GCCF have, in similar fashion, permitted limited review of its standards and award decisions. Arguably, the GCCF has provided even more circumscribed review of the facility’s administrative decisions than did the WTC Fund.

As indicated above, Feinberg’s management of the WTC Fund was accountable in several ways, including the notice-and-comment period accompanying the development of standards at the outset of the fund. On the other hand, substantial aspects of Feinberg’s administration of the WTC Fund were subject to only limited, independent judicial review. For example, several claimants brought a challenge in federal court to the

14 See discussion of WTC notice-and-comment rulemaking, supra at Part II.C.

15 Alexander, Procedural Design, supra n. 5 at 683–84 (ATSA expressly provides that the Special Master’s decisions on claims to the September 11th Fund are not subject to judicial review’); Steenson & Sayler, The Legacy of the 9/11 Fund, supra n. 14 at 546–47;
WTC Fund’s promulgated criteria. Judge Hellerstein held that he had jurisdiction to entertain these legal challenges, and he upheld the constitutionality of the rules. Nevertheless, Judge Hellerstein additionally held that he did not have authority to consider judicial challenges to Feinberg’s awards made pursuant to the WTC Fund standards. Thus, after the court determined the constitutionality of the standards, claimants had no further recourse in federal court to challenge Feinberg’s administrative awards.

Instead, in managing the WTC Fund, Feinberg instituted an internal hearing process for so-called “Track B” claimants. Thus, claimants who did not wish to accept the offer of a WTC Fund award could request an individualized hearing before a WTC staff member, and could present particularized information in support of an increased award. The decision of the WTC Fund staff was final, and a claimant had no further recourse to any judicial or non-judicial review.

In developing plans for the GCCF, Feinberg considered an appeals process early on, indicating that he intended to provide for review by appointing three judges to oversee this process. During ensuing months, with an appeals process still not in place, Feinberg modified his earlier pronouncements and indicated that he would appoint a three-person panel, not necessarily consisting of judges, but persons of similar professional credentials, such as law professors or local, knowledgeable wise men.

The entire GCCF appeals process and the mechanisms for appellate review are unclear. The protocol for emergency payments made no

324 See discussion of Feinberg’ early representation that GCCF claims would involve three-judge appeal panels, at note 327.
325 See David Hammer, New Gulf Oil Spill Claim Rules Announced by Ken Feinberg, The Times Picayune (Nov. 23, 2010) (Feinberg adds limited appeals process for applicants who dispute interim or final determinations; possibility of appeal to Coast Guard; Feinberg to select distinguished retired judge or law professor to appoint several appeal judges).
provision for appeal of awards. Feinberg’s publication of rules for final awards indicate the opportunity for an appeal before a three-person review panel, but implementation of this process has remained vague. There has been no public disclosure of the creation or identity of Feinberg’s panels of three wise reviewers. However, the guidelines for final settlement awards permit dissatisfied claimants to reject offered awards and bring suit in court or seek remediation from the National Pollution Funds Center.

The lack of a review mechanism for GCCF awards gained the attention of the Department of Justice, which urged Feinberg to put such a mechanism in place. In this vacuum, Feinberg also endorsed an appeals process through the auspices of the United States Coast Guard, presumably operating under the authority of the OPA. To date, the Coast Guard has processed 264 out of 507 appeals, and in every case has agreed with the GCCF.

The mechanisms available for review of WTC Fund and CGFF decisions raise a number of legitimacy questions. To begin, the WTC Fund did not provide for independent judicial review of awards and this made the WTC Fund the ultimate arbiter of its own compensation decisions. In a similar vein, Coast Guard appellate review of GCCF decisions would be subject to a three-judge panel appeared as early as June 17, 2010, on a White House blog reporting Feinberg’s appointment. See White House Blog, A New Process and a New Escrow Account for All Oil Spill Claims from BP (June 17, 2010), available at http://www.whitehouse.gov/blog/2010/06/17/a-new-process-and-a-new-escrow-account. The White House blog indicated that the facility would develop standards for recoverable claims that would be published, and that a panel of three judges would be available to hear appeals of the administrator’s decisions.

See GCCF Protocol for Emergency Advance Payment, supra n. 62.

See Are the Victims of the Gulf Oil Spill Getting What They Deserve?, The Wash. Post (Nov. 24, 2010) (appeal to Coast Guard or three-judge panel); The representation that Feinberg’s decisions would be subject to a three-judge panel appeared as early as June 17, 2010, on a White House blog reporting Feinberg’s appointment. See White House Blog, A New Process and a New Escrow Account for All Oil Spill Claims from BP (June 17, 2010), available at http://www.whitehouse.gov/blog/2010/06/17/a-new-process-and-a-new-escrow-account. The White House blog indicated that the facility would develop standards for recoverable claims that would be published, and that a panel of three judges would be available to hear appeals of the administrator’s decisions.

See Gulf Coast Claims Facility Protocol for Interim and Final Claims at V. D, E (Nov. 22, 2010), available at http://www.gulfcoastclaimsfacility.com/protocol (indicating that a claimant could elect or reject an interim final payment determination and, as permitted by law, or sent a claim either to the National Pollution Funds Center or commence an action in court. Claims for physical injury or death are not claims under the OPA and therefore cannot be presented to the National Pollution Funds Center. In addition, if an interim or final payment is denied, the claimant may present a claim to the National Pollution Funds Center or institute a suit in court.

Brian Skoloff, Gulf Oil Spill Claims, Just 1 Final Payment, http://news.yahoo.com/s/ap/20110131/ap_on_bi_ge/us_gulf_oil_spill_claims (last accessed on February 1, 2011); Are Victims of the Gulf Coast Oil Spill Getting What They Deserve?, The Wash. Post (Nov. 25, 2010) (referencing possibility of appeal to Coast Guard as well as to three-member appeals panel).
awards also does not constitute a judicial review, and to date the Coast Guard has validated every GCCF decision. Second, the provision for internal staff review of the WTC Fund and GCCF awards effectively makes the fund the auditor its own decisions—a questionable source for independent review. Third, although the GCCF’s webpage indicates that claimants may seek a panel review of awards, the reality of this avenue for appellate review may be illusory. Finally, Feinberg’s sweeping declaration of his authority to appoint judges to review GCCF awards is an unsettling assertion of power, and Feinberg’s subsequent decision to appoint persons of various, unspecified credentials as appellate reviewers is equally questionable.

F. Transparency

Feinberg’s management of the WTC Fund afforded a relatively good degree of transparency in the creation and administration of the fund.331 This transparency was due, in no small measure, to the fact that Feinberg was answerable to numerous constituencies. Thus, the WTC Fund was created by federal statute, subject to federal rulemaking processes, under the jurisdiction of both the Attorney General of the United States, the Justice Department, and several Congressional committees. Feinberg had a reporting duty to Congress and was answerable to several influential legislators with affected constituencies. In addition, the highly public and traumatic nature of the events giving rise to the creation of the WTC Fund, as well as the heightened emotional volatility of the claimants, all converged to impel maximum transparency in the WTC Fund’s implementation.332

Transparency was manifested in several ways throughout the administration of the WTC Fund.333 Both the enabling statute authorizing creation of the WTC Fund and the rulemaking process it triggered were open and publicly available to any interested person. Feinberg and his staff read and responded to thousands of comments and proposals during the rulemaking process,334 and continued to respond to constituent questions and demands throughout the life of the fund.335

The WTC Fund staff created an extensive website with information and posted data concerning claims processing.336 Famously, Feinberg

331 See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 214 (“The Special Master did provide a degree of transparency on a cumulative basis.”); Rooks, Compensation for Victims of Terrorism, supra n. 9 (“Despite its imperfections, the victim compensation fund was a model of economy and transparency.”).

332 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 64–65. In commenting on his experience in administering the WTC Fund, Feinberg noted the importance of transparency: “Process. Openess. Sunshine. Sunlight. All very important.” See Feinberg, The Building Blocks, supra n. 9 at 275.

333 See Feinberg, Transparency and Civil Justice, supra n. 7 at 475–478.

334 Id.

335 Id.

336 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 14–15 (describing outreach
held numerous town meetings in several locations to directly respond to prospective claimant’s concerns. Feinberg’s staff also undertook extensive initiatives to contact every potential claimant to the fund, to provide advice and encouragement to participate in the fund. Feinberg himself participated in numerous public appearances and media interviews to explain and defend the ongoing fund actions. When the WTC Fund effectively closed, Feinberg prepared and presented a Final Report to Congress, setting forth in significant detail the creation, implementation, and closure of the WTC Fund.

Although the implementation of the WTC Fund accorded a high degree of transparency, in other respects the operation of the Fund was opaque. Thus, in making award determinations, Feinberg relied on the staff analysis and recommendations supplied by the accounting firm Price, Waterhouse. Feinberg refused to provide claimants with the expert reports prepared by his office as part of the claims evaluation process, and therefore claimants were denied access to critical information concerning how their awards were determined. In addition, claimants were not supplied with written decisions or a hearing record.

In contrast to the operation of the WTC Fund, the administration of the GCCF has been shadowed by multiple public charges of a lack of transparency as well as delay. The Department of Justice, cognizant of efforts).

343 Diller, Tort and Social Welfare Principles, supra n. 15 at 761 (failure to provide expert reports to claimants is “troubling”); see also Diller, id. at 767 (“Because the [award] resolution in each case occurs in a confidential proceeding that generates no written decision and is not subject to review, it has no means of filtering back up the system through a process of oversight or accountability.”); Schneider, Grief, Procedure, and Justice, supra n. 19 at 477–78.
344 Diller, Tort and Social Welfare Principles, id. at 761, 767.
345 Id. at 761. Diller suggests that these omissions may be analogized to arbitration procedures, but critically notes that Fund claimants were not engaged in arbitration and had not waived their due process rights by electing a remedy through the Fund.
346 See e.g., Ylan Q. Mui, Louisiana Officials Urge BP to Speed Claims Payments, Wash. Post (July 6, 2010), available at http://www.washingtonpost.com/wp-dyn/content/article/2010/07/05; But see Snyder, BP Spill Claims From 50 States Confront Administrator Feinberg, supra n. 39 (indicating that as early as August 16, 2010, Feinberg had set aside a “modest amount”, which he did not disclose, to compensate Gulf State realtors, whose trade association had met with Feinberg the week before. “The
these charges, contacted Feinberg to request that he take immediate measures to improve transparency in the implementation of the GCCF. Feinberg responded to the Justice Department, indicating that he would undertake such additional measures, and defensively arguing that his administration of the GCCF already was transparent. It is difficult to ascertain what additional measures Feinberg has pursued, in response to the Justice Department request, to enhance transparency in his administration of the GCCF.

On balance, at least some events surrounding administration of the GCCF have been transparent, similar to the WTC Fund. For example—and drawing on his WTC Fund experience—Feinberg has made a number of well-publicized trips throughout the Gulf Coast region and held a number of “town meetings.” On the other hand, far from satisfying local potential claimants, many have objected to the window-dressing nature of such meetings, which locals characterized as lacking in substance to address their questions and needs. Similar to the WTC Fund experience, Feinberg’s staff has created and posted an informational website to assist potential claimants, with daily updates supplying claims data.

Notwithstanding these outward manifestations of transparency, much information about the creation and the operation of the GCCF remains opaque. Feinberg’s designation and appointment as the fund’s administrator was completely non-transparent. His selection of staff to Realtors have “suffered a great deal” in lost sales, rent, and commissions, (Feinberg said.”). 347 See Letter from Thomas J. Perrelli, Office of Associate Attorney General, U.S. Department of Justice to Kenneth Feinberg (Nov. 19, 2010).

348 See Letter from Kenneth R. Feinberg, Administrator, Gulf Coast Claims Facility to The Honorable Thomas J. Perrelli (Nov. 30, 2010). See also John Schwartz. Final Settlement Phase Starts for BP Oil Spill, N.Y. Times (Nov. 24, 2010) (attorneys critical of general release of all parties). Feinberg has endorsed the important value of transparency in accomplishing his work. Feinberg, Transparency and Civil Justice, supra n. 7. Thus, in discussing his administration of the WTC Fund, Feinberg has indicated: “Transparency—giving people in this case due process—I think was extremely valuable.” Feinberg, id. at 475.

350 See various criticisms of town hall meeting attendees, supra at notes 110-12.

352 Id. at www.gulfcoastclaimsfacility.com (GCCF Program Statistics).
run the numerous regional claims offices—their identity, number, credentials, training, and experience—is unknown and unavailable. The process of developing rules, standards, and guidelines for compensation awards was accomplished without formal contributions from interested parties, and largely consummated in private by Feinberg and his staff, with the selected input from some attorneys, BP, or other lobbyists on behalf of special interests.

In addition, although the GCCF website provides data on the numbers and types of claims processed, it fails to provide any information specifying the value of individual awards. In contrast to the WTC Fund and its publicly available compensation grid, claimants to the GCCF have scant information upon which to make a reasoned estimate concerning the amounts they might be expected to receive as an emergency payment or final settlement award. Information relating to the review of awards has not been available, nor is there any publicly available information about the nature and identity of Feinberg's review panels. If three-person panels have been appointed, there has been no public disclosure of these entities.

Moreover, Feinberg's interactions with BP officials and executives have not been transparent, nor has the funding of Feinberg's firm, the GCCF, experts, other law firms, local officials, and entities retained by Feinberg. The revelation in early February 2011 that BP had secretly negotiated a $10 million final settlement with one of BP's business partners, without the participation of GCCF staffers or Feinberg, raised further questions about the facility's lack of transparency, particularly regarding BP's intervention into GCCF decision-making. In essence, with the exception of his town hall meetings, virtually all Feinberg's actions have been non-transparent. If any BP or GCCF actions have been

353 See Neil King Jr., Feinberg Ramps Up $20 Billion Compensation Fund, W.S.J. (June 21, 2010), supra n.76 (referring to a team of nearly 1,000 clerks and adjusters processing claims in 33 field offices from Louisiana to Florida).

354 See Urbina, BP Settlement Likely to Shield Top Defendants, supra n. 109 (documenting changes in proposed protocols for emergency payments as a consequence of lobbying by BP, plaintiffs' attorneys, and state attorneys general on behalf of real estate agents).

355 See GCCF Protocol for Emergency Advance Payment, supra n. 62 (privacy provision).

356 See Feinberg, Transparency and Civil Justice, supra n. 7 at 477, where Feinberg notes: "The defendant does not want transparency. The defendant wants ninety-nine percent of everybody to participate, but again, we're counting on the plaintiff lawyer to make sure everybody is on board." See also See Urbina, BP Settlement Likely to Shield Top Defendants, supra n. 109 (BP's lobbying for application of the collateral source rule to GCCF payments).

357 Brian Skoloff, 91,000 Gulf Oil Spill Claims, Just 1 Final Payment, http://news.yahoo.com/s/ap/20110131/ap_on_bi_ge/us_gulf_oil_spill_claims (last accessed on February 1, 2011); See Urbina, BP Settlement Likely to Shield Top Defendants, supra n. 109.
disclosed, they have been disclosed only after-the-fact and as accomplished reality.\textsuperscript{358}

A final note about transparency and fund approaches to resolving mass tort claims. Although the WTC Fund was characterized by an unusual level of public transparency in its creation and implementation, in the final analysis the WTC Fund experience failed to impart perhaps the most useful data this experiment could have provided for future claims resolution.\textsuperscript{359} Because the WTC statute put claimants to an election of remedies between the WTC Fund and the tort litigation system, the WTC Fund accidentally created a naturally-occurring empirical experiment concerning whether claimants would be better off pursuing remediation through a fund or the tort system.\textsuperscript{360}

As Feinberg repeatedly boasted in the aftermath of the WTC Fund, only 3\% of eligible claimants eschewed the fund and instead chose to hire attorneys, file lawsuits, and pursue litigation in federal court.\textsuperscript{361} To date, all those claims have been settled; the final remaining lawsuit arising out of the World Trade Center events is scheduled for a jury trial in June 2011.\textsuperscript{362}

Against this statistical backdrop, both the WTC Fund\textsuperscript{363} and the federal court overseeing the independent lawsuits have refused to disclose any information concerning individual awards to claimants through the fund or judicial settlement, citing privacy concerns.\textsuperscript{364} Although the claimants' privacy concerns are well-grounded, this resulting lack of transparency has impeded the assessment of the fundamental question whether resolving a claim through a fund

\begin{itemize}
\item \textsuperscript{358} Id. See also David Hammer, \textit{New Gulf Oil Spill Claim Rules Announced by Ken Feinberg}, The Times Picayune (Nov. 23, 2010) (Gulf Coast attorneys criticize Feinberg for lack of transparency).
\item \textsuperscript{359} Although Feinberg purports to support he values of transparency, he apparently believes in only limited transparency. Thus: "On the other hand, query, can you even get the deal done is the public has a right to know? Or does that cloud the opportunity to even get the deal done, if I know it's going to be in the newspapers the next day?" Feinberg, \textit{Transparency and Civil Justice}, supra n. 7 at 478.
\item \textsuperscript{360} See Linda S. Mullenix, \textit{The Future of Tort Reform: Possible Lessons From the World Trade Center Victim Compensation Fund}, 53 Emory L. Rev. 1315 (2004) (suggesting that the WTC Fund provided such a natural empirical experiment).

\item \textsuperscript{363} Feinberg, \textit{Transparency and Civil Justice}, supra n. 7 at 477 ("We announced ranges so that the New York Times couldn't figure out who received what: "Last week ten people received a total of twelve million," and we fudged it all up so that there's some information available, total amount spent of the taxpayer's money, but not so much transparency and sunshine so that the New York Times can knock on the lady's door and print an article the next day.").
\item \textsuperscript{364} See Feinberg \textit{et al.}, \textit{FINAL REPORT OF THE SPECIAL MASTER} at 64-65 (balancing transparency and confidentiality concerns).
\end{itemize}
mechanism is preferable to an adjudicated claim in the legal system. Because of the lack of transparency in disclosing actual award and settlement amounts, commentators will never be able to meaningfully evaluate the competing arguments whether fund approaches are superior to the litigation system. Nonetheless, as GCFF administrator, Feinberg persists in urging claimants to seek compensation through the GCCF, as a better means for resolving their claims.

G. Election of Remedies/Waiver/Release

The WTC Fund statute famously required that claimants to the fund relinquish their right to pursue relief through litigation in the tort system. In the aftermath of the WTC Fund, commentators have variously debated whether this election of remedies requirement constituted a benign paternalism on the part of Congress, or rather embodied a stealth tort reform initiative designed to protect corporate defendants from thousands of tort claims. Without addressing or resolving this debate, it is sufficient for the purpose of comparison to simply note that claimants to the WTC Fund had to elect their remedies.

Several problems arose in the context of the WTC Fund experience regarding the election of remedies. At first, claimants became concerned that the mere filing of a potential claim with the WTC Fund would effectuate election of the fund remedy, and would foreclose a subsequent decision to pursue litigation. Consequently, many potential claimants delayed filing with the WTC Fund out of fear that the decision might preclude the ability to file a lawsuit. To deal with this problem, Feinberg announced that the mere filing of a claim with the fund would not preclude a subsequent decision to abandon the fund claim.

---

365 ATSA at § 405(c) (2) (A) (ii), (3) (B) (ii). The Fund compensated only for personal injury and death, but required claimants to waive their right to sue for all damages, including property damages. See Alexander, Procedural Design, supra n. 5 at 671–72. In discussing the election of remedies feature of ATSA, Professor Ackerman has suggested:

Had the Fund simply been an option that the victims and their families could pursue, it would have been hard to complain about its legal consequences. Instead, the Act forced victims and their families to choose between the Fund and what appeared to be a whittled down tort remedy, thereby adding strength to arguments that the Fund was inadequate in substance or deficient in procedural protections.

Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 183.

366 See Alexander, Procedural Design, supra n. 5 at 672 ("Waiver of tort claims was an essential part of the statutory purpose of protecting the airlines from massive liability . . . the necessity of shielding the airlines from tort liability in excess of their insurance coverage was deemed more important than preserving victims' right to sue.").

367 See In re September 11th Litig., 2003 WL 231455579 (S.D.N.Y. 2003) (mere filing of a preliminary application with the Victim Compensation Fund would not constitute an election of remedies or a defense to a claimant's right to proceed with litigation).

368 Id.

369 Id. at *2.
Instead, Feinberg developed a standard by which a WTC Fund award would have to be “substantially complete” in order to trigger the exclusive remedy provision. In this fashion, claimants could decide whether to elect the fund remedy, armed with particularized information concerning the amount of their award. In accepting and finalizing an award, WTC claimants released any and all claims for future compensation as a consequence of the events surrounding the September 11th disaster.

In addition, the WTC Fund’s election of remedies provision also raised statute of limitations problems for Feinberg. Relying on state law statutes of limitation, Feinberg discovered that some local statutes of limitations might expire before potential fund claimants could decide whether to file a claim with the fund or with relevant jurisdictions. To avoid the possibility that some claimants might elect judicial remedies in the face of expiring statute of limitations, Feinberg sought judicial relief from such statutes in order to encourage claimants to participate in the fund rather than pursue litigation.

In administering the GCCF, Feinberg from the outset made clear that the GCCF would operate in the same fashion as the WTC Fund, and require claimants to waive their rights to litigate in the judicial arena. In promoting the GCCF, Feinberg repeatedly has urged claimants to participate in the fund and to forego filing lawsuits in the courts, much to the irritation of the plaintiffs’ bar. However, a Gulf Coast claimant’s waiver of the right to litigate does not apply to emergency payments in the first phase of the GCCF; the waiver is a requirement of a final settlement award.

370Id.
371Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 85 n.7 (“The Act provides that ‘[u]pon submission of a claim to the Fund, a claimant waives the right to file a civil action (or to be a party to the action) in any Federal or State court for damages sustained as a result of the terrorist-related aircraft crashes of September 11th, 2001.’” See ATSA at § 405(c) (3) (B) (i).
373Id.; see also Schneider, Grief, Procedure and Justice, supra n. 19 at 475–476, 480–84 (discussion of problem of statutes of limitation and approaches taken in WTC Fund and litigation).

- 85 -
claims at any time from the GCCF facility, and seek a remedy in the judicial system. 385

H. The Future Claimant Problem

Both the WTC Fund and the GCCF facility have implicated issues relating to future claimants: that is, persons exposed to toxic substances who have not yet manifested injury, but may do so in the future. The resolution of future claims has been a central problem in resolving mass tort litigation. 386 Generally, defendants involved in mass tort litigation desire “global peace” or the complete resolution of all current and potential future claims that might be asserted against them. 387 The estimation and valuation of future claims, representation for future claimants, and waiver issues have complicated the resolution of many latent injury mass torts. 388

The WTC Fund made no provision for future claimants. 389 Hence, the only claimants eligible to pursue relief through the fund consisted of the legal representatives of people who had died or were injured in the twenty-four hour period after the Twin Towers were struck, 390 or within ninety-six hours after the crashes for rescue workers who assisted in efforts to search for and recover victims. 391 Moreover, for the most part, the WTC Fund compensated eligible claimants only for physical injury and death; the Fund did not compensate for claims of psychological injury or trauma. 392 The WTC Fund also made no provision for the future claims of first responders to the disasters, or persons who worked at the disaster sites during the extensive clean-up operations afterwards. 393

After closure of the WTC Fund, various individuals came forward with classic latent injury claims, chiefly consisting of an array of respiratory impairments alleged as a consequence of exposure to the toxic soup of substances generated when the Twin Towers collapsed, and

390 67 Fed. Reg. 11,242 (March 13, 2002); Rabin, id.
391 28 C.F.R. § 104.2(b) (2002).
392 Alexander, Procedural Design, supra n. 5 at 685 (“There may be other types of injuries that should be compensated as well—people who were held hostage but not physically injured, or persons who were not physically injured but suffered emotional trauma”); Eggen, Toxic Torts at Ground Zero, supra n. 15 at 415–16.
in the months of ensuing site clean-up. Included among these claimants were first responders, construction workers, and individuals who were present in lower Manhattan on September 11th. 394

Several commentators criticized the WTC Fund for its failure to address the future claimant problem, 395 and the increasing public demands of various affected constituent groups eventually caused Congress to address these claims through legislation enacted in December 2010. 396 Similar to the stated rationale for the original WTF Fund, the 2010 Act was predicated on the unique events that gave rise to World Trade Center calamity, coupled with the stated need for a national response to the claims of these affected parties. 397

The GCCF also has not addressed the issue of future claimants and how future claimants either may be compensated for latent injuries, or precluded from seeking recovery for latent injuries because of a waiver and release in a final settlement through the GCCF. 398 Many Gulf Coast workers — especially fishermen and boat owners who were idled after the oil spill — were hired by BP to assist in various clean-up efforts in the Gulf waters, as well as on land. 399 During the clean-up, numerous media stories documented insufficient health and protective measures afforded many clean-up workers. 400 Similar to the claims by WTC first responders and construction workers, many Gulf Coast clean-up workers

394 See In re World Trade Ctr. Disaster Site Litig., 270 F. Supp. 2d 357, 360 (S.D.N.Y. 2003); see also Eggcn, Toxic Torts at Ground Zero, supra n. 15 at 417; see generally Rabin, Indeterminate Future Harm, n. 15.

395 Alexander, Procedural Design, supra n. 5 at 685; Eggcn, Toxic Torts at Ground Zero, supra n. 15 at 453–59 (proposing alternative options to address the concerns of victims exposed to toxic substances and dust in similar scenarios to the WTC events);

396 9/11 Health and Compensation Act of 2010, Pub. L. No. 111-347, 111th Cong. 2d Sess. (2010) (to provide medical monitoring and treatment to responders, residents, building occupants and area workers who were directly impacted and adversely affected by the September 11th attack). See also Eggcn, Toxic Torts at Ground Zero, supra n. 15 at 457 (possible legislation to compensate persons exposed to toxic substances).

398 See Cooper, Spill Fund Could Prove as Challenging as 9/11 Payments, supra n. 25 (noting long-term effects of spill might be much worse than anticipated, creating problems in the future); Campbell Robertson, As Claims for Spill Losses Shift to Administrator, Queries Follow, N.Y. Times (Aug. 23, 2010) (skeptical crowd at bingo hall expresses concern over August 2013 deadline for final settlement of claims; deadline may fall before true extent of damage is known); John Schwartz, For Kenneth Feinberg, More Delicate Diplomacy, N.Y. Times (July 16, 2010) (Feinberg indicates he plans to work with experts to project long-term effects, but noting that most people will accept lump-sum payment once it is offered).

complained that they were not supplied with sufficient respirator equipment and other protective gear to insulate against toxic fumes and substances.\footnote{Id. (noting lack of proper gear and respirators for clean-up workers).}

Consequently, it is entirely possible that some Gulf Coast claimants who file claims with the GCCF for property and business loss compensation may subsequently manifest future illnesses or disease from exposure to toxic substances because of these claimants' participation in the clean-up efforts. In seeking a final settlement of their claims, GCCF participants are required to sign an all-encompassing waiver and release, which conceivably embraces any future personal injury claims.\footnote{See e.g., Strassel, Mr. Fairness, supra n. 3 (Feinberg's urging potential claimants to sign up with the GCCF riles tort-law community; tort bar and state attorneys general raise very legitimate policy issues about releasing BP from liability before all damage from the spill is known).} Hence, participation in a final settlement with the GCCF may preclude these claimants from subsequently seeking further recovery.

Gulf Coast claimants, then, are put to a hard choice, as is always the problem with latent injury mass torts. Thus, claimants must choose between accepting current compensation and waiving future recovery, or declining immediate payment and preserving the right to pursue relief for future manifestation of injury. Because potential Gulf Coast claimants must file with the GCCF facility within before August 2013, many may not have not manifested any latent injury or know the extent of their damages before this deadline. Hence many claimants in desperate need for immediate compensation may forego relief for future claims, while others may opt out of the process and sue.\footnote{Robertson, As Claims for Spill Losses Shift to Administrator, Queries Follow, supra n. 67 (claimants may opt out and sue due to uncertain nature of extent of damage).}

Finally, the problem of future latent injury relief is further complicated by notice and due process issues.\footnote{See Stephenson v. Dow Chem. Co., 273 F.3d 249 (2d Cir. 2001).} It is entirely unclear the extent to which GCCF claimants are advised, either by GCCF staffs or by independent attorneys, of the potential waiver of their claims for future latent injury if they seek final settlement of their current claims. The GCCF website is unclear on this issue,\footnote{See Information Regarding Free Legal Assistance, available at http://www.gulfcoastclaimsfacility.com/probono.} and to date many Gulf Coast claimants have not received independent counsel in seeking interim emergency relief.\footnote{Dionne Searcey, BP Oil-Spill Claims Get Fast Track, W.S.J. (Dec. 13, 2010) (Feinberg to announce that anyone who wants lawyer to help them sort through new options can have one for free; Feinberg plans to hire firm to offer free legal services); Dominic Massa, Feinberg Hires Gulf Coast Law Firms to Assist BP Claims Processing, WWLTV (Dec. 28, 2010), available at http://www.wwltv.com/news/local/.} Again, lack of transparency frustrates efforts to determine whether adequate due process measures are in place to
educate Gulf Coast claimants to the full consequences of their election of remedies through the GCCF, and the possible forfeiture of future latent injury claims.

I. Applicable Law

The September 11th events as well as the Deepwater Horizon explosion and Gulf oil spill involved claimants from multiple jurisdictions. Consequently, both incidents implicated complicated questions relating to the law that might apply to the victims' subsequent claims. The WTC Fund provided one template for dealing with choice-of-law issues. And, to a somewhat similar extent, in administering the GCCF Feinberg has loosely followed the choice-of-law decisions he applied in managing the WTC Fund. On the other hand, applicable law problems relating to the Gulf oil spill are much more complicated than for the WTC Fund, and to date, these applicable law problems have not been resolved with any consistent approach.

The statute authorizing creation of the WTC Fund embodied two different approaches to the choice of law problems inherent in the September 11th events, with one choice-of-law regime for persons who elected compensation through the WTC Fund, and another choice-of-law regime for claimants who elected to seek relief through litigation in the court system. Persons who died or were injured in the World Trade Center Towers, the Pentagon, or the United Airlines crash in Pennsylvania came from a number of different states and countries. A large number of victims who died in the WTC building collapses came from the New York, New Jersey, and Connecticut metropolitan area. Similarly, victims of the Pentagon attack were concentrated in the Washington D.C. metropolitan area, embracing claimants from Virginia, Maryland, and the District of Columbia.

In administering the WTC Fund, then, Special Master Feinberg conceivably faced the resolution of personal injury and wrongful death claims pursuant to the laws of many jurisdictions. The WTC enabling legislation did not mandate any choice-of-law principles to guide Feinberg's implementation of the fund. Because the overriding purpose of the WTC Fund was to remove victims' claims from the tort
litigation system and provide expeditious resolution, it made no sense to complicate the administration of the WTC Fund by the application of different legal standards depending on where claimants were from, or the happenstance of their presence at a particular disaster site. Therefore, Feinberg was given relatively free rein to design a compensation model without being tethered to any state’s legal principles.

During Feinberg’s administration of the WTC Fund, commentators and claimants frequently raised the issue of what law would apply to resolve various issues relating to the design and implementation of the fund, including but not limited to eligibility criteria, statutes of limitation, claim valuation, collateral sources, and award allocation among competing claimants. In response to these various challenges, Feinberg responded that he would be guided by, but not bound by, state law principles. In some instances—for example with regard to award allocation issues—Feinberg refused to resolve the problem at all but instead admonished WTC Fund recipients to litigate such disputes in state court pursuant to state legal standards.

During the course of WTC Fund proceedings, Feinberg never clearly indicated which states’ laws he relied on in making his various decisions affecting the fund’s standards and administration. In the end, in an exercise not unlike the creation of federal common law, Feinberg essentially created his own common law standards to govern implementation of the WTC Fund, based loosely on unidentified principles and precedents.

The WTC Fund’s enabling statute more clearly resolved the applicable law issue for those persons who chose litigation in the court system. Hence, the enabling statute mandated that any lawsuits arising

414 See Schneider, id.
415 See e.g., Feinberg, Negotiating the Victim Compensation Fund, supra n. 9 at 22 (referring to the fact that in calculating economic loss he vaguely would look to general principles of state tort law: “That is simply tort law, a surrogate for what juries in St. Louis do every day.”).
416 For example, Feinberg refused to decide allocation issues among contending family members, instead telling them that they would have to resolve such disputes in state court.
417 See e.g., Chamallas, The September 11 Victim Compensation Fund, supra n. 5 at 75–76 (noting that the availability of survival damages differs among states); Conk, Will the Post-9/11 World Be a Post Tort-World?, supra n. 24 at 186 (“Rather there was a sense of rough equity, informed by tort and by legislative reference points); Walker, Lessons That Wrongful Death Law Can Learn From the September 11 Victim Compensation Fund, supra n. 15 at 602–03 (describing how Feinberg departed from state law in defining who was an eligible personal representative to receive an award from the fund: “Unlike the states, Feinberg combined the role of the personal representative and beneficiary.”)
418 Id.
419 ATSA at § 408(b) (2); See Alexander, Procedural Design, supra n. 5 at 673–74;
out of the September 11th events were required to be brought in the U.S. District Court for the Southern District of New York, and further mandated that applicable law would be the law of the state in which the crash occurred, unless it was inconsistent with or preempted by federal law. Although providing clarity to prospective claimants, the statutory limitation of litigants' choice of venue and law also cabined conventional litigation strategy and served as an additional deterrent to electing the litigation option. Pursuant to this statutory mandate, the lawsuits of the claimants who elected the litigation option were consolidated in the Southern District of New York, subject to the case management of Judge Alvin Hellerstein under New York law.

In contrast, the GCCF was created pursuant to only vague and ambiguous statutory authority under the OPA—questionably if at all—and therefore which federal or state legal rules apply in the administration of the GCCF fund have been equally murky. Relying on a page from his WTC Fund playbook, however, Feinberg has indicated in media interviews that the standards and criteria governing implementation of the GCCF would be derived with reference to state law. The protocol for emergency advance payments merely stated that the GCCF would evaluate all claims "guided by applicable law." And, similar to his administration of the WTC Fund, Feinberg has not yet

(June 21, 2010), supra n. 76 (indicating that Feinberg stated that he would turn to state law for guidance on which types of claims to honor and which to dismiss); Anna Fifield, Mediator Puts Fairness at Centre of BP Fund, Financial Times (June 25, 2010), available at http://www.ft.com/cms/s/0/13bc5dc0-807-11df-be5a-00144feabdc0 (citing 9/11 experience; indicating that Feinberg would look to state law to recognize claims; commenting on how he might deal with different states' laws); Daniel Fisher and Asher Hawkins, BP's Legal Blowout, Forbes.com (July 14, 2010) (Feinberg indicates he plans to rely on state tort principles), available at http://www.forbes.com/2010/07/14/bp-oil-spill-settlement-business-energy-lawsuits; See e.g., Neil King Jr., Feinberg Criticized, supra n. 107 (Feinberg suggesting that deductions for BP clean-up payments wasn't unusual under state law); Strassel, Mr. Fairness, supra n. 3 (suggesting that payout rules would be broadly based on federal oil-spill law and Gulf-state tort law).

GCCF Protocol for Emergency Advance Payments, supra n. 62 at I.B.
clarified what state law, if any, he is applying in his administration of the GCCF.

The applicable law problem in the context of the BP Deepwater Horizon disaster, moreover, is much more complicated than the legal landscape presented by the September 11th events. Unlike the September 11th claims, no statute determines applicable law for those Gulf Coast claimants who elect litigation remedies, and therefore applicable law in the litigated cases will be determined by MDL court presiding over the consolidated lawsuits. Moreover, the Gulf Coast Deepwater Horizon disaster implicates a broader array of possible federal and state statutory claims, including claims under the OPA, securities laws, the Jones Act, various federal environmental statutes, general maritime law, as well as state common law causes of action.

The breadth of potential bases for recovery in the Gulf Coast disaster, then, has bearing on a claimant’s evaluation of the election of remedies. Unlike the WTC Fund which involved only personal injury and death claims, Gulf Coast victims conceivably have multiple theories of recovery for an assortment of personal, property, business, contract,

427 The MDL court determines applicable law for the cases transferred and consolidated before it. See e.g., Menowitz v. Brown, 991 F.2d 36 (2d Cir. 1993); In re Lou Levy & Sons Fashions, Inc., 988 F.2d 311 (2d Cir. 1993).

428 Feinberg sought the expert advice of Professor John C.P. Goldberg concerning limitations of recovery under the OPA and parallel state laws. Professor Goldberg concluded that under the OPA and parallel state laws, only some of economic losses were recoverable from those responsible for the spill. Thus, to recover under the OPA for economic losses caused by the spill, a claimant must establish that his or her loss was due to damage of loss of property or resources, which damage or loss prevents the claimant from exercising the right to put that property or those resources to commercial use. See John P.C. Goldberg, Liability for Economic Loss in Connection with the Deepwater Horizon Spill at 3, 48 (Nov. 22, 2010)[on file with the Louisiana Law Review]. But see Bryan Walsh, Oil Spill: Kenneth Feinberg Makes the Final Rules for Spill Settlement, But Are They Fair? (Nov. 24, 2010), available at http://ecocentric.blogs.time.com.2010/11/24/ (noting that hotel groups might attempt to sue BP rather than go through the claims process, but that Feinberg believed they wouldn’t have much luck, relying on the expert opinion of Professor John C.P. Goldberg of Harvard Law School regarding applicable law).

431 See e.g., the National Environmental Policy Act [add citation].

tort, and environmental injuries. Several securities lawsuits also have been filed as a consequence of the BP disaster.\textsuperscript{433} There are compelling reasons, then, why a Gulf Coast claimant might sensibly choose to litigate their claims rather than seek an award from the GCCF.\textsuperscript{434}

Finally, the embedded applicable law problems in relation to the GCCF raise important questions concerning the adequacy of notice that GCCF claimants receive about applicable law in making an informed decision about their election of remedies, as well as implications in agreeing to a comprehensive release upon a GCCF final settlement.

J. Assistance of Counsel

A much-roted and admired attribute of the WTC Fund was the actions of the plaintiffs' bar to the September 11th events.\textsuperscript{435} In the immediate aftermath of the disaster, the leading organization of the plaintiffs' bar, the Association of Trial Lawyers of America (ATLA), notified its membership and requested that plaintiffs' attorneys not exploit the tragic events as an opportunity to solicit potential clients.\textsuperscript{436} One day after the disaster, ATLA issued a call for a moratorium on all lawsuits.\textsuperscript{437} This organizational self-restraint by ATLA stood in marked contrast to the reaction of the plaintiffs' bar in the aftermath of the mass toxic disaster at the Union Carbide plant in India,\textsuperscript{438} when hundreds of American lawyers descended on the scene in an attempt to retain as many clients as possible—which solicitation brought considerable worldwide disrepute on the American bar.\textsuperscript{439}

Not only did ATLA immediately counsel restraint among its membership after September 11th, but ATLA also sponsored an

Pallasch, \textit{For Once, Lawyers Reluctant to Sue: Victims' Relatives Seek Legal Action, but Moratorium Urged}, Chi. Sun Times at 22 (Sept. 17, 2001). Robert Peck notes that the moratorium held for a long time, and was only breached by a handful of lawsuits. See Peck, \textit{id.} at 215.

enormous effort to organize the voluntary participation of hundreds of attorneys in providing legal assistance to claimants who wished to pursue compensation through the WTC Fund. ATLA incorporated the “Trial Layers Care” (TLC) program to provide pro bono representation to victims before the Fund. The TLC opened offices in New York and trained hundreds of volunteer attorneys to represent victims.

Special Master Feinberg welcomed the participation of these voluntary attorneys, who assisted any claimant who desired an attorney to help prepare the paperwork necessary in filing a claim. From the outset of his efforts, Feinberg widely publicized the availability of free counsel to any potential WTC Fund claimant who desired an attorney. Feinberg stressed the fact that no potential WTC claimant would go without counsel if they desired an attorney. Feinberg’s Final Report to Congress documented the thousands of hours of pro bono work performed by voluntary attorneys in assisting WTC Fund claimants. In addition to the ATLA attorneys, Feinberg worked pro bono and also contributed the assistance of the attorneys at his firm, which recouped only its expenses in implementing the WTC Fund.

Apart from the attorneys who acted pro bono on behalf of WTC claimants, at least some plaintiffs’ attorneys undertook representation of claimants who rejected compensation through the WTC Fund and instead decided to pursue litigation. The role of the assistance of counsel, as well as the outcomes in the WTC litigated cases, is discussed below. However, it is significant to note that, for the most part, the plaintiffs’ bar eschewed a campaign to discourage WTC victims from pursuing relief through the WTC Fund. Very few plaintiffs’ attorneys attempted to

---

441 See Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 71; Peck, id. at 225. See also Steenson & Sayler, The Legacy of the 9/11 Fund, supra n. 14 at 548–49;
442 Id.
443 But see Diller, Tort and Social Welfare Principles, supra n. 15 at 762–765 (analyzing the role of pro bono and non-pro bono attorneys in assisting claimants in the Fund; critically suggesting that Feinberg’s controversial role in administering the Fund created a “market for expertise” in the operation of the Fund, benefitting some claimants but not others. In addition, Diller critically notes that attorneys with personal relationships to Feinberg were able to trade on those connections, favorably for the persons they represented); Schneider, Grief, Procedure, and Justice, supra n. 19 at 477 (Feinberg’s unbridled discretion lead to perceptions of unfairness; “It leads to a sense that he will make individualized “deals,” and indeed, he does. Lawyers can trade on “insider” access to, or contact with, him.”)
444 But see Schneider, Grief, Procedure, and Justice, supra n. 19 at 479 (suggesting that the Fund’s processes actually were very complex and intimidating, requiring not only lawyers to assist them, but also economists in many cases).
445 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER, supra n. 4 at 71.
446 Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER, id.
dissuade claimants from filing with Fund, or attempted to persuade claimants to file lawsuits in the civil justice system instead. 447

The Deepwater Horizon explosion presents a striking contrast regarding the role of attorneys in pursuing relief for the victims of the Gulf Coast disaster. First, the organized plaintiffs’ bar did not issue any communiqué counseling restraint in the aftermath of the oil spill events, similar to ATLA’s public pronouncement after September 11th. Second, the plaintiffs’ bar did not organize to provide voluntary, pro bono assistance to any claimant requesting legal advice in navigating the requirements to seek emergency or final awards in the GCCF. And third, the plaintiffs’ bar has, since June 2010, publicly protested various actions by the GCCF and Feinberg in implementing the facility. 448

In addition, in the early days of the GCCF, Feinberg publically stated that claimants wouldn’t need lawyers to help them navigate the claims process, 449 and consistently has urged potential claimants to seek awards from the GCCF. 450 In response to Feinberg’s seeming discouragement of retaining counsel, and in contrast to the WTC experience, many plaintiffs’ attorneys have publicly advocated that Gulf Coast victims not to seek relief through the GCCF. 451 In addition, as discussed above,

447 See discussion of plaintiffs’ attorneys’ role in aftermath of WTC events, at notes 435-36.

449 Brian Baxter, Feinberg Talks of Criteria for Gulf Claims, Says Lawyers Not Needed, AmLaw Daily (June 21, 2010), available at http://amlawdaily.typepad.com/-amlawdaily/2010/06/feinberg-bp-claims.html (Feinberg indicating that “this will be a very transparent process where you will walk into one of numerous office throughout the gulf, file a claim, even electronically if you want, and we will immediately be able to process that claim.”); Feinberg Says BP Fund Will Be Generous, Better Than Lawsuits, Bloomberg News (July 15, 2010), available at http://businessweek.com/news/2010-07-15/feinberg-says-bp-fund-will-be-generous (Feinberg indicates not necessary to hire attorney because his office will have attorneys on staff to provide free legal services)

Times (July 16, 2010) (reporting; Feinberg’s urging claimants to sign up: “It’s my opinion you are crazy if you don’t participate; discouraging potential claimants from litigation because of years of uncertainty in the courts and “big cut for the lawyers.”); see also BP Creates Special Team to Speed Up Claim Payments, ABC News (Aug. 3, 2010), available at http://abernews.go.Business (reporting that BP was encouraging businesses to contact their adjuster or BP1 to process claims); Strassel, Mr. Fairness, supra n. 3 (Feinberg stating that the overall message is this: “If we’re not going to pay, nobody’s going to pay. That’s my philosophy on this thing.”); Robertson and Schwartz, Rethinking the Process, supra n. 113 (Feinberg announces that lawyers around the country can play an important role in the GCCF by helping claimants package their claims).

451 See Amanda Brosestead, Oil Spill Fund Won’t Deter Litigation, N.L.J. (Aug. 30, 2010)
attorneys involved in the parallel Gulf Coast Oil Spill MDL litigation successfully enjoined Feinberg from advocating that victims of the Gulf Coast oil spill seek relief exclusively through the GCCF. 452 No similar efforts were made to enjoin Feinberg in his administration of the WTC Fund.

Building on his experience in administering the WTC Fund, Feinberg has made several efforts to enlist the assistance of voluntary attorneys to assist claimants who wish to file with the GCCF. 453 Unlike the WTC Fund experience, though, few attorneys have been enlisted to supply pro bono legal assistance to Gulf claimants. 454 Against the backdrop of this failure, Feinberg has made repeated public announcements that the GCCF would provide counsel to any person needing legal assistance. 455 It is uncertain the extent to which this promise has been fulfilled, 456 and media reports indicate that many claimants have filed for benefits without the assistance of counsel, because many victims cannot afford to hire an attorney and the facility has not made counsel available to them. 457 In late fall 2010, Feinberg (describing plaintiffs' attorneys views on the GCCF versus the litigation option).

454 Hammer, New Gulf Oil Spill Claim Rules Announced by Ken Feinberg, id. (Feinberg stating that "national legal organizations have not stepped up to the plate.").

Times (Dec. 12, 2010) (reporting that Feinberg's team would make free legal advice available and would add staff at local centers for the fund to help people fill out their forms for final claims), available at http://www.nytimes.com/2010/12/13/us/13fund.html?

announced that the GCCF would be retaining the assistance of several private law firms to assist claimants, presumably on a paid-basis. However, the details of these arrangements with private firms to supply assistance of counsel to claimants have not been publicly disclosed, signifying yet another aspect of GCCF administration that is lacking in transparency.458

One of the major factors justifying the WTC Fund as a preferable means for resolving mass tort claims was the fact that a claimant’s compensation would not be diminished by a sizeable attorney-fee award.459 This rationale justifying the preference for a fund solution to mass disaster remediation has been undermined by developments in the GCCF. Thus, in late January 2011, several plaintiffs’ attorneys in the Gulf region broke ranks with the MDL plaintiffs’ attorneys and changed course, publicly urging Gulf Coast claimants to seek compensation through the GCCF.460

These attorneys have indicated their willingness to represent residents and businesses in seeking GCCF awards, based on contingent fee arrangements for this representation.461 This has pitted one segment of the plaintiffs’ bar against the MDL attorneys. And, in contrast to the WTC Fund where plaintiffs’ attorneys worked pro bono and did not charge the WTC claimants fees for assistance with making a WTC Fund claim, the Gulf attorneys undertaking representation for GCCF awards will charge a percentage of a claimants’ recovery from their GCCF award. Hence, at least one major justification for the superiority of fund resolution of claims is not present for the GCCF claimants who elect such representation.

K. The Litigation Option

Although 57% of eligible claimants elected compensation relief through the WTC Fund, 3% of claimants retained private counsel and

458 See Gulf Coast Claims Facility Announces Next Phase of the Compensation Program, supra n. 456.

459 Diller, Tort and Social Welfare Principles, supra n. 15 at 764; Steenson & Sayler, The Legacy of the 9/11 Fund, supra n. 14 at 937–38; see also Preamble, September 11th Victim Compensation Fund of 2001, 66 Fed. Reg. 66,280 (Dec. 21, 2001) (indicating that contingency fee arrangements for attorneys representing claimants before the Fund, exceeding 5% of a claimant’s recovery of the fund, would not be in the best interests of claimants.”).

460 Dionne Searcey, Oil-Spill Lawyers Urge Clients to Settle; Move Would Shift Gulf Residents’ Claims Form Court to BP’s Compensation Fund; “Most of These People Can’t Wait,” W.S.J (Jan. 28, 2010) (group of lawyers redirect dozens of claimants to BP Fund).

461 Searcey, Oil-Spill Lawyers Urge Clients to Settle, id.; Alliance of Lawyers of Fienberg: We’ll Take It; W.S.J. (Jan. 28, 2011).
pursued litigation arising out of the September 11th events.462 In all, ninety-five suits were filed, seeking recoveries for ninety-six claimants. The WTC Fund were filed in the federal district court for the Southern District of New York and were consolidated in the before Judge Alvin K. Hellerstein.463 Seventy-six of these cases ultimately settled; only one unresolved September 11th lawsuit remains and is scheduled go to trial in June 2011.464 Thirteen lawsuits settled quickly;465 and the remaining 82 cases were settled through the auspices of experienced mass tort litigator Sheila Birnbaum, who Judge Hellerstein appointed to serve as a mediator to resolve these remaining suits.466 In order to spur settlement of the lawsuits, Judge Hellerstein ordered bifurcated bellwether trials.467

In his administration of the September 11th cases, Judge Hellerstein kept a fairly tight rein over the advocacy efforts of the plaintiffs' lawyers. In concert with special master Feinberg, and as a condition of continuing litigation, Judge Hellerstein required that all individual plaintiffs discuss with their attorneys the alternative remedy in the WTC Fund, and to weigh the risks and transaction costs of proceeding in the litigation process.468

The WTC victims who elected the litigation option proceeded with had some advantages in comparison to pursuing relief through the WTC Fund option.469 For example, in filing their lawsuits, the plaintiffs'

462 See Feinberg et al., FINAL REPORT OF THE SPECIAL MASTER at 1.
463 In re September 11th Litig., 600 F. Supp. 2d 549 (S.D.N.Y.) (upholding exclusive jurisdiction of Southern District of New York as remedy for damages arising out of Sept. 11th terrorist attacks). For a description of the array of types of cases consolidated in Judge Hellerstein's court, see Conk, Will the Post 9/11 World be a Post-Tort World?, supra n. 24 at 189.
469 Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 186–188; Rabin, The Quest for Fairness, supra n. 11 at 586–87 (weighing the relative risks and benefits of the litigation option, including no collateral source offsets and the possibility of punitive damage recovery).
attorneys were able to identify a universe of defendants not relevant to the WTC Fund’s settlement of claims. Thus, the plaintiffs’ attorneys named as party-defendants the security firms at the airports where the terrorists had boarded the aircraft, the building architects and firms involved in the design and construction of the World Trade Center Towers, the Port Authority, the owners of the Twin Towers, and numerous other defendants. In an interim MDL ruling, Judge Hellerstein upheld the designation of these entities as legitimate defendants, thereby strengthening the plaintiffs’ litigation posture. Judge Hellerstein also issued an interim order enabling discovery from the Transportation Security Administration. Judge Hellerstein’s orders also spurred the settlement of several lawsuits on his September 11th docket.

In addition, the collateral source rule did not apply to reduce claimants’ awards by the amount provided through these benefits. In theory, then, WTC victims who chose the litigation option received both a settlement award and were able to retain their collateral source benefits.

On the other hand, the WTC claimants who elected civil litigation were constrained by certain factors that had no relevance to those who elected compensation through the WTC Fund, and that also would not ordinarily constrain civil tort litigation. Thus, WTC enabling statute limited the litigation plaintiffs’ choice of venue to the federal district court in New York City, and also limited the applicable law. In addition, the litigation plaintiffs had to pay attorney fees, and thus their settlement awards were reduced by this transaction cost, which was not a factor for WTC Fund claimants. Finally, the resolution of the civil litigation plaintiffs’ lawsuits took longer to resolve by settlement than if they had elected to receive compensation for the WTC Fund.

But see Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 185–86 (suggesting that a finding of negligence on the part of the airlines, security firms, airports, or aircraft manufacturers was anything but certain in the private litigation).

In re September 11th Litig., 280 F. Supp. 279, 289 (S.D.N.Y. 2003); see also In re September 11th Litig., 2004 WL 1320897 (S.D.N.Y. 2004) (denying defendants’ motions to dismiss pursuant: to the waiver provision of ATSA). See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 188 (“Still, by surviving the motions to dismiss, the plaintiffs had surmounted a significant hurdle in the § 408 litigation.”); Conk, Will the Post 9/11 World be a Post-Tort World?, supra n. 24 at 212.

Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 183.

In re September 11th Litig., 600 F. Supp. 2d 549 (S.D.N.Y.) (upholding exclusive jurisdiction of Southern District of New York as remedy for damages arising out of Sept. 11th terrorist attack:).

The last mediated case was resolved in March 2009; the remaining jury trial case is scheduled for June 2011.
In addition, Judge Hellerstein reviewed the individual proposed settlements, to assure consistency with previous WTC awards. In at least four hold-out cases, Judge Hellerstein rejected agreed settlements that he believed provided for excessive awards and attorney fees that were inconsistent with previous awards and settlements. The parties involved in these rejected settlements re-negotiated and reduced the settlements terms to Judge Hellerstein’s final satisfaction.

As indicated above, Judge Hellerstein in his court opinions, and mediator Birnbaum in her report to the court—citing privacy concerns—both declined to divulge any information relating to the valuation of individual settlement awards. Also citing privacy concerns, Feinberg’s Final Report to Congress only indicates aggregate settlement valuations, rather than individual awards. Consequently, there is no available data to evaluate whether claimants who elected to retain counsel and pursue litigation in the aftermath of the September 11th disaster received a financially more favorable outcome than claimants who elected relief through the WTC Fund.

At this writing, the alternative litigation options for Gulf Coast claimants who choose not to seek remediation through the GCCF are relatively immature and undeveloped. The litigation landscape, however, is much more complicated than the single litigation track that developed after the September 11th events. In turn, administrator Feinberg has actively discouraged potential claimants from pursuing litigation.

With regard to the Gulf Coast explosion and oil spill, there are at least three simultaneous litigation tracks underway. The Judicial Panel on Multidistrict Litigation finally approved a Gulf Oil Spill MDL, and

480 See In re September 11th Litig., supra.
483 See Feinberg, et al., FINAL REPORT OF THE SPECIAL MASTER at 64–65.
484 In spite of the absence of comparative data, one commentator nonetheless maintains that the option of electing the Fund remedy was preferable to pursuing litigation in the tort system. See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 190–91 (“Even so, measured against the likely (rather than theoretical) outcome of a conventional tort action, even absent the constraints of [the MDL litigation], the Fund looks like an excellent option for the overwhelming majority of eligible claimants.”).
transferred and consolidated all oil-spill related cases in federal district court in Louisiana. In January 2011, presiding Judge Barbier selected the lead counsel’s committee to represent and develop the litigation. The Louisiana MDL does not include securities class actions, which have been transferred to the federal district court in Houston, Texas, for adjudication. In addition to these lawsuits, the Gulf State Attorneys-General anticipate filing litigation asserting governmental claims for various damage to the Gulf States, pursuant to an array of environmental statutes and common law theories. In addition, the federal government has under consideration its own legal actions, including the possibility for criminal violations arising from the Deepwater Horizon explosion and oil spill.

In addition to the collection of different pending litigation, the lawsuits relating to the Deepwater Horizon events implicate complicated federalism issues, a significant array of federal and state statutory and common law claims, multiple defendants, and complicated choice-of-law problems. Unlike the WTC experience, the litigation arising out of the Gulf Coast events is not statutorily cabined to one venue and one applicable law. Nor is it likely that one federal judge will oversee resolution of all pieces of Gulf Coast litigation relating to these claims, as Judge Hellerstein did in managing the WTC litigation. Indeed, Judge

487 See Brian Baxter, David Boies Wants Lead Role in BP Litigation, N.Y. Lawyer (Sept. 29, 2010); Dionne Searcey, Modesty is Out as Lawyers Vie for Key Spots in BP Suit, W.S.J. (Sept. 28, 2010) (hundreds of attorneys competing for selection for leadership posts in the MDL and its steering committees).

490 Perez & Searcey. id. (Justice Department expected lawsuits under environmental protection statutes); John Schwartz, U.S. Sues Companies for Spill Damages, N.Y. Times (Dec. 15, 2010); John Schwartz, U.S. Sues Companies for Spill Damages, N.Y. Times (Dec. 15, 2010) (Department of Justice criminal investigation).

Barbier has signaled his willingness to rein in Feinberg and his staff when appropriate, as manifested in Judge Barbier’s February 2, 2011 order enjoining Feinberg and his law firm.\footnote{Order and Reasons, In re Oil Spill by the Oil Rig “Deepwater Horizon” in the Gulf of Mexico, on April 20, 2010, MDL 2179 (Feb. 2, 2011) (granting plaintiffs’ motion to supervise ex parte communications with putative class).}

Finally, at this immature stage of the litigation, it is already clear that a fissure has developed in the plaintiffs’ bar, with some attorneys seeking resolution of claims through the MDL auspices, others aligned to pursue securities violations through the class action mechanism, and a third group seeking to represent clients in the GCCF in return for percentage-based fees.\footnote{See Tom Hais, Gulf Coast Attorneys to Lead U.S. Oil Spill Lawsuits, Reuters (Oct. 10, 2010); Brian Baxter, Steering Committee Members Selected for Gulf Coast Oil Spill Suits, AmLaw Daily (Oct. 11, 2010); Searcey, Oil Spill Lawyers Urge Clients to Settle, supra n. 460.} Clearly, the MDL attorneys seeking to enjoin Feinberg in his GCCF efforts are not aligned with the plaintiffs’ attorneys who are advocating claimant relief through this facility.

L. Defendants

As indicated at the outset of this article, one important characteristic that distinguishes the Deepwater Horizon events from the September 11th disaster is that in the Gulf Coast case, it is readily apparent that there are likely culpable defendants. The Coast Guard’s immediate identification of BP as a responsible party under the OPA supports this contention.\footnote{The Coast Guard almost immediately designated BP as a “responsible party under the Oil Pollution Act of 1990, Pub. L. No. 101-380, § 102, 104 Stat. 484, 489 (codified at 33 U.S.C. § 2702 (2006).}

As suggested above, several scholars have commented that one factor that made the WTC Fund an attractive alternative to the tort litigation system was the problem—especially in the early weeks following the WTC events—of identifying potential defendants to sue in litigation.\footnote{Alexander, Procedural Design, supra n. 5 at 637 (“Although all the victims of September 11th appeared as “deserving” of large recoveries as anyone could possibly be, they could not recover damages from the real culprits, the hijackers and their accomplices, who were either dead or out of reach.”). As it turned out, the WTC plaintiffs who pursued litigation in federal court were able to identify and name numerous defendants, and Judge Hellerstein upheld their potential liability in the litigation. See notes 470-71.}

Hence, the problematic nature of identifying culpable defendants, coupled with the difficulty of establishing legal liability for tort claims as against any of these potential defendants, was used to persuade WTC victims that their better remedy was though the WTC Fund. Although this argument proved persuasive for many in the context of the WTC Fund, several commentators subsequently have argued that the WTC Fund was unique in this regard, and the fund approach should not be
replicated in situations where there were known, identifiable defendants allegedly responsible for a mass tort disaster.496

In addition, as the subsequent parallel September 11th litigation demonstrated, the plaintiffs who chose to litigate their claims were able to identify an array of defendants in their lawsuits, including the private airport security firms (denominated the “Aviation defendants”), building architects and construction firms, the Port Authority, and other entities.497 In a challenge brought by the Aviation Defendants, Judge Hellerstein denied their motions to dismiss on the grounds that they owed no duties to the plaintiff’s, and that the defendants could not reasonably have anticipated that several terrorists would hijack jumbo jet aircraft and crash those killing passengers, crew, and others on the ground.498

In contrast the WTC events, an array of potentially culpable defendants exist regarding liability for the Deepwater Horizon disaster, including but certainly not limited to BP. Indeed, the GCCF final waiver form includes an Appendix listing several dozen entities seeking release from litigation as a consequence of settling with the GCCF.499 Moreover, not only is there a substantial list of potentially liable parties, but the legal theories that might support such claims are less attenuated than in the WTC litigation. Hence, the “problematic defendant” argument, in support of a fund resolution of mass tort claims, has scant relevance in the context of the GCCF.

III. The Evolution of Models of Fund Approaches to the Resolution of Mass Claims

Historically, European and other western-industrialized countries have relied on fund resolutions of claims in resolving mass tort events.500 Thus, for example, Germany, Japan, and the United Kingdom quickly resolved the claims of the so-called “thalidomide babies” in the 1960s by providing compensation and life-time support for children born with severe birth defects as a result of their mother’s ingestion of the

496 See e.g., Rabin, The September 11th Victim Compensation Fund, supra n. 8 at 780–81, 798, 799–803 (suggesting that responsible defendants ought to be charged with the losses reflecting what is required to make a deserving plaintiff whole).

497 See Eggen, Toxic Tort at Ground Zero, supra n. 15 at 411, 432.

498 In re September 11 Litig., 280 F. Supp. 2d 279, 287 (S.D.N.Y. 2003). See also In re September 11th Litig., 280 F. Supp. 279, 289 (S.D.N.Y. 2003). See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 188 (“Still, by surviving the motions to dismiss, the plaintiffs had surmounted a significant hurdle in the § 408 litigation.”); Kreindler & Alexander, September 11th Aftermath, supra n. 267 (commenting on defendants in the September 11th litigated cases).

499 See GCCF Final Settlement Release and Waiver, Attachment A, supra n. 380 (listing all potential defendants released from liability and lawsuit under the settlement agreement).

pharmaceutical thalidomide in this era. These various funds were the product of the combined efforts of the respective governments and the culpable drug manufacturer, who jointly contributed to compensation funds to provide relief for these claimants. In this fashion, government and industry combined to provide claimants with expeditious relief without the necessity for litigation, findings of causation, liability and damages.

In the United States, by contrast, the use of funds to resolve mass tort litigation has never gained comparable traction. There are many reasons for this, not the least of which is the embedded American legal culture of adversarial justice and right to trial by jury. Nevertheless, a few historical examples of American experiments with compensation funds include the Black Lung Program pursuant to the Black Lung Benefits Act, the National Vaccine Injury Compensation Program, and the Price-Anderson Act, which provides for strict statutory liability in the case of nuclear plant disaster. In addition, Congress enacted the National Swine Flu Act in 1976, creating a fund to compensate victims who died or were injured from inoculations administered by a government-mandated program.

Of the American historical funds, the Black Lung program often has been cited as an ineffectual mechanism for compensating coal miner claimants. Notably, all these funds are authorized by federal statute; moreover, the childhood vaccine program and the Price-Anderson Act authorize funds that financially are supported by the industries engaged in the potentially hazardous activity that might give rise to liability.

502 Id.
504 42 U.S.C. § 300aa-11(a). The National Childhood Vaccine Injury Act of 1986 established a program to compensate children injured by exposure to vaccines; it is internally funded by a tax imposed on the sale of each dose of vaccine sold. See for description of the implementation of this program, see Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 30.
508 Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 30.
Specifically, the Price-Anderson Act requires that entities engaged in the production of nuclear energy contribute to a fund in case of a prospective disaster that might require remediation to victims of a nuclear plant disaster. The Act limits plants’ liability to $560 million for all claims arising from a single nuclear accident. To be eligible to participate in this fund mechanism, nuclear licensees must maintain at least $160 million in private insurance and contribute up to $10 million annually to a pool of funds designed to total $47 billion dollars. In the case of disaster, the Nuclear Regulatory Commission declares an extraordinary nuclear occurrence and the Act sets up a system of strict liability in which all defenses are waived. In order to receive compensation, a claimant must only show that their injuries result from a nuclear power plant accident.

The September 11th events and the creation of the WTC Fund marked the first significant American experiment with a fund approach to compensating large numbers of claimants for tortious injury, and the GCCF represents the second such large-scale compensation effort outside the judicial system. As indicated above, because the WTC Fund and the GCCF share a common administrator, the GCCF has mimicked the WTC Fund in many aspects of its creation and implementation. On the other hand, the GCCF represents a radical departure from the WTC Fund, and the ways in which the GCCF differ from the WTC Fund are cause for great concern.

The arc of Ken Feinberg’s career neatly demonstrates the evolution of at least three different fund models, progressing from arguably the most legitimate to the arguably the least legitimate (and most lawless). This evolution illustrates a seamless progression from (1) a judicially-approved and managed class action fund to (2) a Congressionally-mandated and supervised fund, to (3) a defendant-created and directed fund. In the haste to embrace the fund approach to mass claim resolution, little attention has focused on how these “funds” have evolved from entities governed by the rule of law to a model essentially unconstrained by law.

Feinberg’s initial experience with the use of a fund to resolve mass claims involved his participation as a special master in the Agent Orange litigation in the late 1970s and early 1980s. Feinberg himself frequently refers to this formative experience and as the basis for techniques he engrafted onto his management of the WTC Fund and the

GCCF, such as the use of town hall meetings to address the victims' concerns and to make the claims process more personal for its participants.\textsuperscript{514}

The Agent Orange fund model, however, is jurisprudentially light-years removed from the GCCF. First, the Agent Orange fund was created to implement a negotiated class action settlement.\textsuperscript{515} The Agent Orange litigation began with hundreds of lawsuits filed in state and federal courts.\textsuperscript{516} Many years of contested litigation preceded the adversaries' ultimate agreement to settle a class action and create the Agent Orange fund.\textsuperscript{517}

The Agent Orange litigation was managed under the close supervision of Judge Jack Weinstein,\textsuperscript{518} and the Agent Orange fund was a creature of a Rule 23 class action settlement.\textsuperscript{519} Whatever role Feinberg may have played in the resolution of the Agent Orange litigation, he was appointed as a special master in that litigation under the authority of Federal Rule of Civil Procedure 53.\textsuperscript{520} Feinberg's authority and powers in the Agent Orange Fund were limited and circumscribed by law, and he was answerable to the federal court.\textsuperscript{521}

Moreover, it is important to emphasize that the Agent Orange fund was the creature of a class action settlement.\textsuperscript{522} As such, before this fund mechanism could begin operation to provide compensation to Viet Nam veterans, the Agent Orange settlement had to be judicially reviewed and approved by Judge Weinstein pursuant to Federal Rule Civil Procedure 23(3).\textsuperscript{523} The Agent Orange fund, then, was subject to an array of substantive and procedural due process constraints, not the least of which was the requirement that Judge Weinstein find that class claimants had been accorded adequate representation in settlement of their claims through the fund.\textsuperscript{524}

\textsuperscript{514} See discussion of Feinberg's town hall meetings to address claimants concerns in his implementation of the GCCF facility, supra at notes 106-12.

\textsuperscript{524} Id.
Hence, the Agent Orange fund was created subject to an array of legal constraints, and Feinberg, in his role as special master, did not function as a free-wheeling, unbounded law-giver. Moreover, in the largely uncritical commentary lauding the Agent Orange fund, it is frequently overlooked that the Agent Orange settlement successfully was challenged nearly twenty-five years after Judge Weinstein’s approval of the Agent Orange fund. If the Agent Orange fund is the best example of a fund resolution of mass claims, then it is important to note that the binding effect of the Agent Orange settlement successfully was challenged on due process grounds for the failure to provide future claimants with adequate representation.

Feinberg’s second experience with a fund approach to resolving mass claims was his administration of the WTC Fund. The WTC Fund represented an innovative approach to resolving mass tort claims against the backdrop of national tragedy. In terms of both substance and procedure, the WTC Fund drew loosely from its class action cousins. But, as has been described at length above, the WTC Fund was not the result of class litigation or the close judicial supervision entailed in settling class litigation.

Thus, the WTC Fund represents a fund archetype that is once-removed from the class action model, although not without legal constraints. Hence, the WTC Fund was a creature of federal statute, was subject to Congressional oversight, and had a “special master” appointed by the Executive branch who remotely was accountable to Congress and the Department of Justice. In addition, the WTC Fund incorporated several features of the rule of law, including public notice-and-comment rulemaking and significant transparency.

Although the WTC Fund was undergirded with legal authorization, the WTC Fund signaled an expansive progression from the class action fund model. The WTC Fund was not created within the scope of authority of the federal judiciary, nor was the WTC Fund subject to judicial oversight and management by a federal judge. Unlike the class action context, decisions relating to the WTC Fund were not subject to review for substantive or procedural due process. Moreover, as indicated above, the WTC Fund special master had liberal rulemaking and other authority, which he increasingly exercised in an ad hoc fashion during the course of the WTC Fund’s history. And the special master’s award determinations were subjected to limited appellate review.

The GCCF represents the third fund model and illustrates an extreme and seemingly lawless expansion of the fund approach to resolving mass claims. To begin, it is difficult to discern the legal authorization for the
fund, other than vague references to the OPA. The GCCF was not created as a mechanism to implement a contested class action settlement, nor did Congress authorize creation of this fund. Thus, the GCCF has not been subject to the scrutiny that would have accompanied a class action settlement or Congressional oversight.

Moreover, it is difficult to characterize exactly what the GCCF is, and what legal status this entity has, if any. Feinberg has described the GCCF as a "compact," federal Judge Barbier has described the GCCF as a "hybrid." The GCCF is largely private claims-adjusting facility acting in ad hoc fashion, run by a culpable party’s retained autocrat. It is not functioning as a mediation or arbitration center, with claims resolution through the auspices of professional mediators or arbitrators. The persons administering claims have not been designated or selected through adversarial processes, and the GCCF is functioning outside judicial scrutiny and seemingly not subject to any professional rules of conduct.

Instead, the GCCF was the result of private, behind-closed-door negotiations with unidentified participants. The fund was created and funded by the primary malefactor, who picked the fund’s administrator. The relationship between BP and Feinberg has raised numerous significant ethical issues, centrally relating to the administrator’s independence. The administrator and his law firm are financially profiting from their administration of the fund. There are numerous indicia that BP has not been operating independent of the fund, but rather has intervened in several crucial decisions relating to the fund’s implementation, which decisions favor BP’s interests.

The GCCF has engaged in no public rulemaking and virtually all its decisions have been cloaked in secrecy, including its criteria and personnel. The fund has operated largely in a non-transparent fashion, with limited avenues for independent appellate review. There has been a significant lack of information upon which Gulf Coast victims might determine the possible valuation of their claims, and whether it makes sense to seek remediation through the GCCF. In spite of promises to provide legal assistance to Gulf Coast claimants, such provision of counsel has been non-existent or slow in being provided. Claims administration has been exceedingly protracted and multiple claims have been delayed or denied. Claimants have complained about inconsistent awards. The waiver required as a condition for the final settlement of claims releases a very large array of potential claims, as well as dozens

528 See e.g., Statement of Kenneth Feinberg, Full Hearing on Recovery in the Gulf: What the $20 Billion BP Claims Fund Means for Small Business, Hearing before the Committee on Small Business, United States House of Representatives, 111th Cong. 2d Session (June 30, 2010).
529 Order and Reasons, In re Oil Spill by the Oil Rig “Deepwater Horizon” in the Gulf of Mexico, on April 20, 2010, MDL 2179 (Feb. 2, 2011) (granting plaintiffs’ motion to supervise ex parte communications with putative class).
of potential defendants in addition to BP. Against this chaotic background, the GCCF’s administrator has repeatedly urged Gulf Coast residents and businesses to seek compensation in the GCCF as the best means for receiving compensation, for which actions the federal court in Louisiana finally enjoined Feinberg. 530

Hence, almost every hallmark supporting the legitimacy of an alternative dispute resolution facility, including important due process protections for claimants, have been lacking in implementation of the GCCF. 531

IV. Conclusion: The GCCF—A Fund Too Far

Not all fund approaches to resolving mass claims are the same, and not all funds are fungible. Nonetheless, “funds” are now invoked with almost talismanic approval, as a preferred means for providing compensation to disaster victims outside the litigation system. 532 Moreover, the CCCF provides a stellar example of the unseemly pressure exerted on disaster victims to quickly seek relief through a fund mechanism, rather than retaining counsel and filing a lawsuit. With the advent of the GCCF, commentators ought to ask probing questions concerning who benefits from these mechanisms, and whether the GCCF model in particular serves the interests of justice, and for whom. 533

The greatest justifications for fund resolution of mass claims are grounded in values of efficiency and economy. 534 The theory underlying fund resolution of claims is that by avoiding the litigation system, claimants receive quick, easy payment of claims and eliminate the risks, transaction costs, and delays inherent in litigation. These themes have pervaded Feinberg’s repeated appeals to claimants to settle with both the WTC Fund and the GCCF.

530 Id.

531 Ironically, Feinberg himself has stated that an excellent alternative dispute resolution facility must satisfy three design variables: substantive criteria, due process protections and mechanics. See Feinberg, The Building Blocks, supra n. 9 at 275. See also n. 460, infra.

532 One critic perceives the trend towards fund solutions to mass tort claims as eroding fundamental justice:

Yet, tort law will continue to be eroded by attrition, by lopping off remedies—especially by limiting damages and expanding immunities—unless we are able to grab hold of the public’s conscience and consciousness to bring home the point that liability in tort is not some form of punishment, erratically inflicted.

Conk, Will the Post 9/11 World be a Post-Tort World?, supra n. 24 at 177.

533 See generally Alexander, Procedural Design, supra n. 5 (enumerating factors to consider in the future design of compensation funds for victims of disaster and terrorist attacks).

534 See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 220 (“Efficiency was a major reason for the Fund, and because of both the manner in which it was tailored and the laudable, professional efforts of the Special Master and his staff, the efficiency goal was me.”).
However, one may legitimately question whether efficiency and economy ought to be the bellwether metrics of a successful compensation program. In contrast, other commentators have suggested that compensation programs ought to be evaluated by the core substantive values of democratic governance, which include the values of participation, accountability, transparency, rationality, personal autonomy, equality, due process and other social capital values necessary to promote civil society. Other commentators have suggested that four elements of procedural justice include: (1) whether procedures allow people an opportunity to state their case, (2) whether authorities are viewed as neutral, unbiased, honest, and principles in their decision-making, (3) whether the authorities are seen as benevolent, caring, and trustworthy, and (4) whether the people involved are treated with dignity and respect.

Against the backdrop of tragic events, Ken Feinberg has emerged as the heroic figure in bringing expeditious and uncomplicated justice to thousands of disaster victims. In this repeated narrative, Feinberg is portrayed as the selfless, self-sacrificing benefactor bringing compassionate relief to thousands of claimants. Because Feinberg’s heroic narrative has so pervasively dominated discussions of both the WTC Fund and the GCCF, less critical attention has been directed to evaluating whether these funds have achieved justice for their recipients, or what justice entails. And, because of Feinberg’s media-created

535 See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 206, citing Richard C. Reuben, Democracy and Dispute Resolution: The Problem of Arbitration, 67 Duke J. of Law & Contemp. Probs. 279, 285–86 (2004); Priest, The Problematic Structure, supra n. 15 at 545 (“The September 11th Fund will remain controversial because the source of the definition of its awards—however able and committed—is not in any sense democratic. Coupled with the lack of an internal rationale or constraint, the awards granted by the Fund will continue to remain problematic.”). Other commentators have suggested that the WTC Fund signaled the beginning of a “broad regressive trend.” See Conk, Will the Post 9/11 World be a Post-Tort World?, supra n. 24 at 253.

536 Tyler and Thorisdottir, A Psychological Perspective, supra n. 15 at 380, 384 (concluding that ‘none of the aforementioned ways of creating perceptions of procedural fairness were utilized when the Fund was initially established).

537 Diller, Tort and Social Welfare Principles, supra n. 15 at 755:

The issue of procedural fairness centers on whether Feinberg has structured an adjudicatory system that bolsters rather than undermines confidence in the fairness of the results it produces. One way or another, the question returns to Feinberg himself because the procedures are all focused on his decision-making process. On this score, Feinberg has handled himself in a manner that is not likely to promote a perception of the Fund as a fair administrative mechanism. Feinberg has adopted a high profile approach with the media and the public. His tendencies to philosophize, argue, console, and offer predictions and advice about the Fund all emphasize his own personal role in making decisions. As a result, awards appear as the product of Feinberg’s personal choices and preferences rather than as the product of dispassionate principled application of legal standards to facts.

538 One critic has opined: “While the Fund creates the special Master, the Special Master
persona, many commentators tactfully have refrained from questioning Feinberg’s actions, lest his critics seem ungracious.

It is impossible to evaluate the WTC Fund and the GCCF without discussion of Feinberg, because Feinberg has made himself synonymous with these funds. In his defensive response to his critics, Feinberg typically defaults to the retort that “no good deed goes unpunished”—a self-serving response that deflects approbation onto his critics. While it may be true that no good deed goes unpunished, it is perhaps relevant to question whether Feinberg—especially in his administration of the GCCF—has been performing good deeds for thousands of grieving and often desperate people.

We conclude by noting that in the myth of Prometheus, things turned out very well for both Prometheus and Hercules, but not necessarily so for mankind. While Prometheus and Hercules went on to greater glory, the gods continued to punish mankind for receiving the gift of fire.

As other mess torts have taught us, BP will survive and prosper in the wake of the Deepwater Horizon disaster, as will Ken Feinberg. Feinberg will continue, in the future, to administer new disaster funds as the need arises, and be lauded for his heroic efforts in administering these massive funds. However, with the GCCF, the precedent has now been set for corporate malefactors who are caught up in the maelstrom of massive liability to discharge their legal responsibilities on their own terms, and favorable to their own interests.

commands the fund. If the role of Special Master lacks legitimacy, then the Fund lacks credibility.” Berkowitz, The Problematic Role of the Special Master, supra n. 18 at 40.

See Ackerman, The September 11th Victim Compensation Fund, supra n. 8 at 197 (“In large part due to his availability, Feinberg came to personify the Fund, and some of the responses to the Fund reflected people’s reactions to him.”); Diller, Tort and Social Welfare Principles, supra n. 15 at 726, 755 (“In both the substantive standards and the procedural model, the spotlight remains focused on the personal choices and values of Special Master Feinberg himself. Regardless of how capable and well-intentioned the Special Master, the Fund vests too much discretion in a single individual with little means of accountability and oversight.”).
